

What’s going on in the marketplace?

Global equity markets again continued their rise marking the fifth straight month. Economic and earnings data that came in better than expected, continued accommodative monetary policy, and optimism for a vaccine set the backdrop for positive market performance. U.S. equities outperformed their international counterparts. In general, fixed income declined as yields rose with U.S. markets modestly underperforming.

The KRS investment portfolio gained 2.5% versus the benchmark return of 2.3%.

Relative outperformance was primarily driven by strong performance in the Core Fixed Income and Non-U.S. Equity portfolios. In addition, the overweight position to both U.S. and Non-U.S. equities was beneficial as these were the best performing asset classes during the month. Offsetting some of the relative outperformance was the weaker performance of the U.S. Equity and Absolute Return portfolios. The overweight position to the Core Fixed Income space was a headwind as this was one of the weaker performing sectors during the period.

U.S. Equities

U.S. markets continued their strong performance during the month, as the Russell 3000 gained 7.2% during the month. All market cap segments were positive, with large caps leading the way with a return of 7.2%; small caps followed and then mid-caps returning 5.6% and 3.5%, respectively. Growth again outpaced value, by 586 bps (R3000G 10.1%, R3000V 4.2%).

During the month, the KRS U.S. Equity portfolio trailed the Russell 3000 Index by 83 bps. From a stock selection perspective, relative performance of the individual mandates was mixed with noteworthy relative weakness coming from the internal factor-based portfolio, the all cap growth mandate, and the small cap allocation. From an allocation perspective, the small tilt down market cap and towards value created a slight drag on performance.

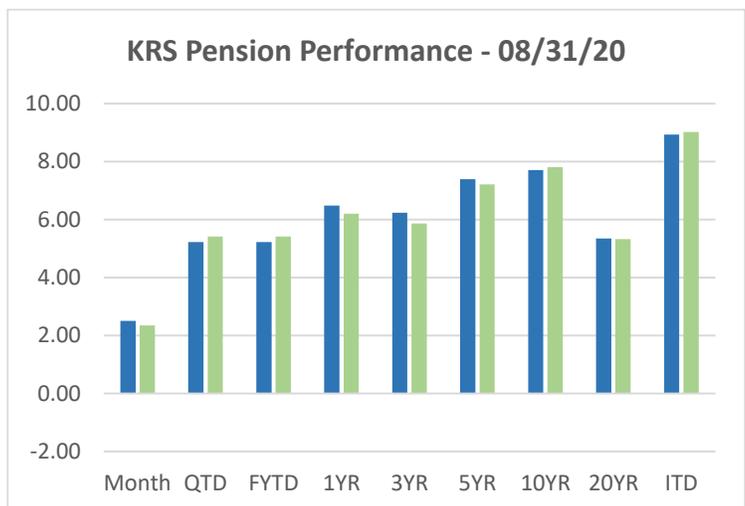

Non-U.S. Equities

Non-U.S. equity gained 4.6% for the month per the MSCI ACWI-Ex US Index. Developed markets (5.2%) outperformed their emerging market counterparts, which gained 2.2%. Growth outpaced value in both developed and emerging countries.

The KRS Non-U.S. Equity portfolio gained 5.0% during the month, outpacing the benchmark by 39 bps. Stock selection was mixed amongst the active MSCI ACWI Ex-US and emerging markets mandates primarily split by style bias. From an allocation perspective, the effect of the small overweight to emerging markets was relatively muted.

Fixed Income

The fixed income markets were mixed during the period, with higher risk segments providing positive returns and traditional safe haven sectors underperforming. Leveraged Loan and U.S. Corporate High Yield markets gained approximately 1.5% and 1.0%, respectively. The intermediate bond market was slightly negative, while the U.S. Aggregate and Barclays Universal Index fell -0.8% and -0.6%, respectively.

The KRS Specialty Credit allocation gained 1.1%, trailing the benchmark by 11 bps, as individual strategies were split versus their respective indices. The KRS Core Fixed Income allocation gained 28 bps, outperforming the Bloomberg Barclays Aggregate by roughly 1.1%. Relative outperformance was due to the tilt towards short-term U.S. credits within the allocation.

Alternative Assets

The diversifying strategy group gained 1.1% during the month; the Opportunistic portion of the group led the way with a 2.5% return. The Real Return portfolio earned 1.3%, followed by the Absolute Return portfolio, which returned 54 bps. The Real Estate portfolio gained 16 bps during the period. The Private Equity portion of the portfolio fell -0.9% during the month.

Cash

The Cash portfolio performed in line with the 3-month T-Bill, returning one basis point during the month.

NOTES:

- 1) Returns displayed are "net". For the purposes of this report, total fund return information is net of fees and expenses, with audited data beginning in July 2011. At the manager level returns are net of fees beginning with July 2011, and gross of fees for prior data.
- 2) Individual plan allocation and performance (pg.4).
- 3) Prior to January 1, 2014, the inception date for the Private Equity asset class was stated as 10/1/1990 for Pension Fund and 6/1/2001 for Insurance Fund. Prior to 07/01/02, the characteristics of the allocation, and the benchmark itself, were more closely aligned with Real Estate. As such, it is not appropriate to report this portion of the return stream within the Private Equity allocation, whose true inception date has been determined to be 07/01/02 based on funding the Systems' first private equity mandate. The portion of the original return streams that are no longer reported within the Private Equity allocation (Pension from 10/1/90 to 06/30/02; Insurance 06/01/01 to 06/30/02) are reported within the Fund Level performance figures.
- 4)

--	--
- 5) The Private Equity & Real Return Benchmarks, from one month returns up until five year returns, is equal to the performance of the associated KRS allocations. Given there is not appropriate benchmark to use for short term performance evaluation, this will allow greater focus on longer term returns, which is more appropriate given the long term nature of these investments.
