MARKET COMMENTARY

U.S. Equity

The U.S. stock market was down -0.76% for the first quarter of 2018. Volatility returned after a tranquil 2017. While the market never experienced a daily loss of 2% or more last year, there were five such down days during the first quarter. Strong jobs reports and wage growth had investors rethinking their inflation expectations and led to concerns that the Federal Reserve might accelerate increases in their short-term rate.

Consumer spending, the main driver of economic growth, will be a key issue to watch in 2018. Consumers are highly interest rate sensitive but the increases in short-term rates that the Federal Reserve has been applying have so far had a muted affect. Fortunately, there are signs of consumer strength. Low unemployment, rising wage growth and borrowing by households are all positive signals.

Non-U.S. Equity

Equity markets outside of the U.S. produced mixed results during the quarter with emerging markets up but developed markets in negative territory. Concerns about global trade conflicts dominated headlines. However, it is yet to be seen whether the future holds a series of escalating tariffs or trade deals like the one announced between the U.S. and South Korea.

Fixed Income

The U.S. Treasury yield curve rose in a parallel fashion during the quarter with most maturities up 35 basis points, on average. The bellwether 10-year Treasury yield ended the quarter at 2.74%. The Federal Open Market Committee decided to increase its overnight rate by 25 basis points in March to a range of 1.50% to 1.75%. Credit spreads widened during the quarter but remain narrow relative to historical observations.

LATE CYCLE CONDITIONS

- U.S. economy entering the “late cycle,” characterized by:
 - Continued economic growth after a lengthy expansion
 - Tightening monetary policy to combat rising inflation
- Common for volatility and correlations to rise during such conditions; rising discount rates lower the present value of all future cash flows

Data source: Wilshire Associates, Bloomberg Barclays

RETURN OF VOLATILITY

- 2017 was one of the least volatile years in nearly four decades
 - Largest drawdown for the year was -2.75%
 - Only 4 trading days where the market was down 1% or more
- Volatility returned during the first quarter of 2018
 - Annualized volatility for the quarter above the historical median
 - “Number of Days Down” statistics are meaningful considering that they are for only one-quarter of the year

	Since 1980	Year	Annual Volatility	Largest Drawdown	Number of Days Down:				Worst Down Day
