FROM: Pamala S. Johnson, General Manager

DATE: November 15, 1990

SUBJECT: Annual Report for Fiscal Year Ending June 30, 1990

As directed by KRS 61.645, I am pleased to present the Annual Report for the fiscal year ended June 30, 1990. The four sections of the report provide financial information, actuarial information, investment information and other statistical information. Appropriate certifications from an independent accounting firm and an independent actuarial firm are included.

Copies of this report will be made available to Retirement System members by sending copies to each participating employer in the Kentucky Employees Retirement System, County Employees Retirement System and State Police Retirement System. Copies will also be distributed to legislative personnel, state libraries and other interested parties.

Pamala S. Johnson
General Manager

INTRODUCTION

by
Pamala S. Johnson, General Manager

Members of the Retirement Systems,

This report represents a full and complete disclosure of the financial and actuarial status of the Kentucky Employees Retirement System, County Employees Retirement System and State Police Retirement Systems.

CONTENTS

This section and the pages that follow provide an introduction to the Board, management and organization of the retirement systems.

The second section is an exact copy of the audit report prepared by the firm of Eskew & Gresham. This report is included in accordance with Kentucky Revised Statute 61.645(12).

The third section consists of copies of the significant pages of the actuarial report compiled by the firm of William M. Mercer, Inc., containing the information necessary to determine the adequacy of funding and the systems' liabilities is included in the same format as presented to the Board.

The fourth section provides you with information on the retirement systems' investments. Included are portfolio summaries for the retirement systems and the Insurance Fund. Also shown are comparisons of portfolio growth and income growth, giving a historical perspective.

The last section provides statistical information on membership, types of payments selected, retirement payments by county and information on retirements during the 1989-90 fiscal year. The following statistical tables present a summary of the actuarial and financial sections. These tables provide a snapshot of the systems. The final table shows administrative expenses.

INVESTMENTS

During the 1989-90 Fiscal Year, the Board of Trustees began the implementation of a revised asset allocation for the retirement systems.

New investment advisors were selected, diversifying the assets, and the process of transferring assets and funds to these advisors was initiated.

LEGISLATION

The 1990 General Assembly enacted a broad range of retirement legislation, ranging from raises for recipients to changes in administrative procedures. The following are the more significant measures enacted which became effective in the 1990-91 fiscal year.

Raise to Recipients--Each recipient received a 4.5% increase effective August 1, 1990. A raise of 4.5% will also be given to recipients in July of 1991. In addition, a special raise was given in August to retirees or their beneficiaries who began receiving benefits prior to 1982. These recipients received a \$2.50 raise on their monthly checks for each year they have drawn benefits.

Benefit Formula Factors--Benefit formula factors were increased for nonhazardous members of the KERS and CERS and for members of SPRS. The KERS benefit factor was increased from 1.91% to 1.97%. The CERS benefit factor was increased from 2.0% to 2.2% and the SPRS benefit factor was increased from 2.41% to 2.50%.

Early Retirement--Nonhazardous members of KERS and CERS saw a reduction in the number of years required for unreduced benefits. These members may now retire at any age without a reduction after 27 years of service.

Sick Leave--KERS members are now permitted to receive retirement credit for all unused sick leave at the time of retirement.

School Employees--Cafeteria workers, secretaries, teachers aides and custodians are now covered by retirement if their employment averages 80 hours per month over the school year. These employees may also purchase credit for prior years that meet the hourly requirement.

Correctional Employees--Employees working in state correctional institutions were extended coverage under the hazardous retirement provisions effective July 1990.

Administration--A formal administrative hearing procedure was created for members appealing denial of disability benefits.

Investment expenses, as well as the administrative expenses of the systems, will now be subject to the biennial budget process, requiring legislative approval.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β . It is shown that the system has solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

2. In the second part of the paper the question of the uniqueness of the solutions of the system (1) is considered. It is shown that the system has a unique solution for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

3. In the third part of the paper the question of the stability of the solutions of the system (1) is considered. It is shown that the system has stable solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

4. In the fourth part of the paper the question of the asymptotic behavior of the solutions of the system (1) is considered. It is shown that the system has asymptotically stable solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

5. In the fifth part of the paper the question of the periodicity of the solutions of the system (1) is considered. It is shown that the system has periodic solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

6. In the sixth part of the paper the question of the boundedness of the solutions of the system (1) is considered. It is shown that the system has bounded solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

7. In the seventh part of the paper the question of the convergence of the solutions of the system (1) is considered. It is shown that the system has convergent solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

8. In the eighth part of the paper the question of the divergence of the solutions of the system (1) is considered. It is shown that the system has divergent solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

9. In the ninth part of the paper the question of the oscillation of the solutions of the system (1) is considered. It is shown that the system has oscillatory solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

10. In the tenth part of the paper the question of the nonoscillation of the solutions of the system (1) is considered. It is shown that the system has nonoscillatory solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

11. In the eleventh part of the paper the question of the monotonicity of the solutions of the system (1) is considered. It is shown that the system has monotonic solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

12. In the twelfth part of the paper the question of the nonmonotonicity of the solutions of the system (1) is considered. It is shown that the system has nonmonotonic solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

13. In the thirteenth part of the paper the question of the boundedness of the solutions of the system (1) is considered. It is shown that the system has bounded solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

14. In the fourteenth part of the paper the question of the unboundedness of the solutions of the system (1) is considered. It is shown that the system has unbounded solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

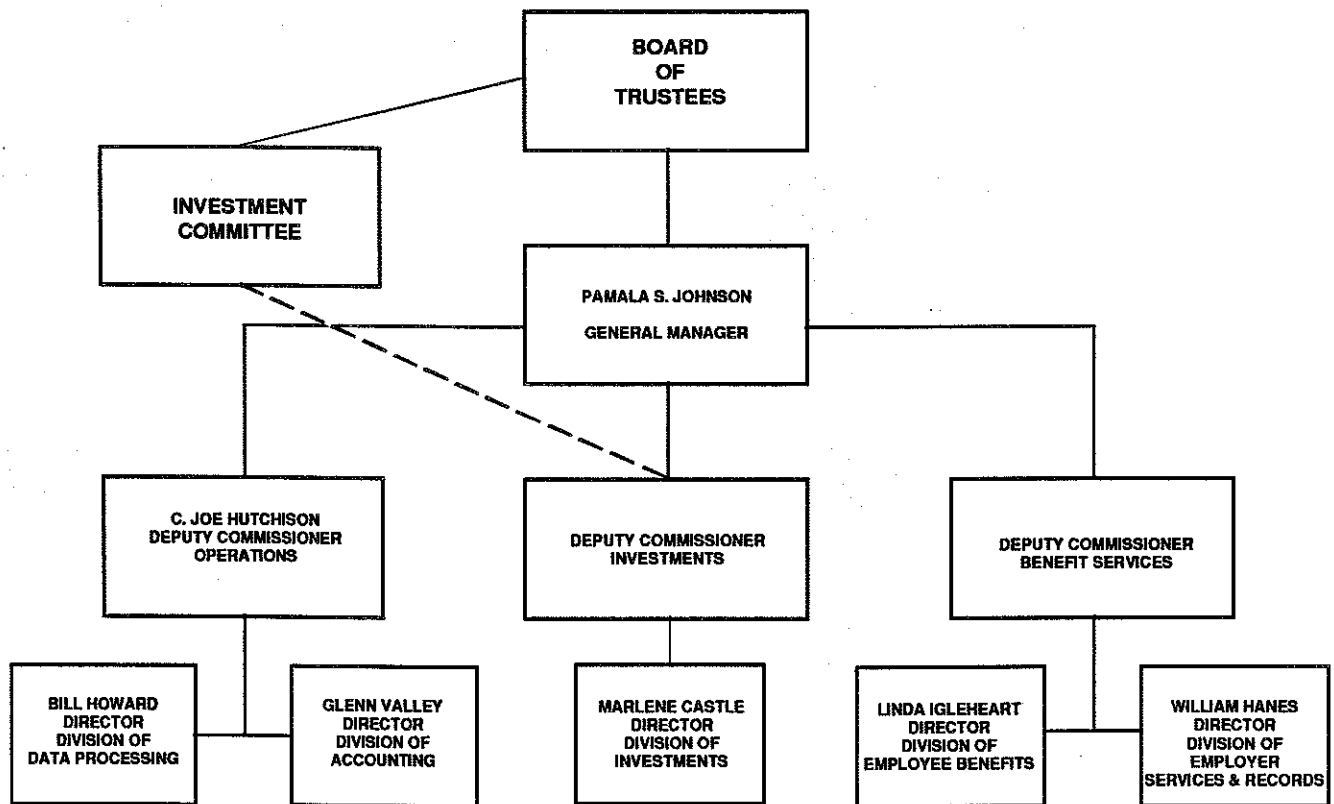

15. In the fifteenth part of the paper the question of the oscillation of the solutions of the system (1) is considered. It is shown that the system has oscillatory solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

16. In the sixteenth part of the paper the question of the nonoscillation of the solutions of the system (1) is considered. It is shown that the system has nonoscillatory solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

17. In the seventeenth part of the paper the question of the monotonicity of the solutions of the system (1) is considered. It is shown that the system has monotonic solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

18. In the eighteenth part of the paper the question of the nonmonotonicity of the solutions of the system (1) is considered. It is shown that the system has nonmonotonic solutions for all values of the parameters α and β if and only if the condition $\alpha + \beta > 0$ is satisfied.

Dear Mr. ...:
I am very pleased to hear from you and
thank you for your letter of the 10th.

I am sorry that I cannot
reply to you more fully at this time.

I am sure that you will
understand my position.

I am sure that you will
understand my position.

I am sure that you will
understand my position.

Very truly yours,
J. H. ...

I am sure that you will
understand my position.

I am sure that you will
understand my position.

I am sure that you will
understand my position.

I am sure that you will
understand my position.

I am sure that you will
understand my position.

I am sure that you will
understand my position.

INTRODUCTION TO FINANCIAL SECTION

The Retirement Systems' assets are held in trust for the purpose of providing retirement benefits many years in the future. Since these benefits are guaranteed by Kentucky law to each eligible participant, it is the responsibility of the Board of Trustees to see that the systems are soundly funded and that all investments, receipts, payments and expenses are fully accounted for.

The following information shows that the systems have excellent financial strength. The combined assets of the Kentucky Employees Retirement System, County Employees Retirement System and State Police Retirement System totalled over \$3.2 billion as of June 30, 1990, an increase of 14% over the previous fiscal year.

To assure that proper accounting methods are being used, the Board contracts with a private accounting firm to perform an independent audit of the assets and liabilities of the three systems. The audit for the fiscal year ended June 30, 1990, was performed by the firm of Eskew & Gresham, PSC.

In addition to the annual audit by a certified public accounting firm, other procedures are employed to insure the safety of the systems' assets. Each year a surprise audit is conducted by the internal auditor of the securities' custodian. Adequate bonding arrangements are in force for those individuals who have access to securities, and the General Manager is under a special fidelity bond. A plan is in place and tested regularly to ensure that the systems assets are protected and programs can be continued in the event of natural disasters.

There were no party-in-interest transactions, no loans or leases in default and no "reportable" transactions during the fiscal year.

An exact copy of the "audit opinion" of Eskew & Gresham follows along with copies of their audited financial statements and accompanying notes. The financial statements were completed in accordance with the requirements set forth in the National Council on Government Accounting, Statement 1, as adopted in "Statement 1 of the Governmental Accounting Standards Board." This statement requires that financial statements be presented on an accrual basis and stipulates that certain disclosures be included in the notes to financial statements.

VOLUME 1

Eskew & Gresham

Board of Trustees
Kentucky Retirement Systems
Frankfort, Kentucky

We have audited the balance sheets of the Kentucky Employees Retirement System, County Employees Retirement System, State Police Retirement System and Kentucky Retirement Systems Insurance Fund as of June 30, 1990 and 1989, and the related statements of revenues, expenses and changes in members' contribution account and retirement allowance account of the Kentucky Employees Retirement System, County Employees Retirement System and the State Police Retirement System and the statements of revenues, expenses and changes in fund balance of the Kentucky Retirement Systems Insurance Fund for the years then ended. These financial statements are the responsibility of the System's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Kentucky Employees Retirement System, County Employees Retirement System, State Police Retirement System and Kentucky Retirement Systems Insurance Fund at June 30, 1990 and 1989, and the results of their operations, the changes in members' contribution account and retirement allowance account of the Kentucky Employees Retirement System, County Employees Retirement System and State Police Retirement System, and the changes in fund balance of the Kentucky Retirement Systems Insurance Fund for the years then ended, in conformity with generally accepted accounting principles.

KENTUCKY EMPLOYEES RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Presentation - The financial statements of Kentucky Employees Retirement System (the System) are prepared on the accrual basis, and generally conform to the provisions of the National Council on Governmental Accounting Statement 1.

B. Investment Securities - Investments in bonds and first mortgage real estate loans are stated at amortized cost. Discount and premium are amortized using the straight-line method from the date of acquisition to stated or expected maturity. Common stocks, securities purchased under agreement to resell and investment in real estate investment trust are carried at cost.

Net realized gain or loss on investments represents the difference between the proceeds from sale or maturity and the average cost of investments sold or redeemed. Realized gains or losses are also recorded for exchanges of investments, based upon the difference at the time of the exchange between the carrying value and the market value of the investment exchanged.

C. Members' Contribution and Retirement Allowance Accounts - These accounts are funded by contributions and investment income. The Members' Contribution Account represents the accumulation of active members' contributions plus interest credited to members' accounts. The Retirement Allowance Account is comprised of retired members' contribution balances including interest credited thereon and accumulated employer contributions plus cumulative excess of revenues over expenses less interest credited to members' contribution accounts.

D. Expense Allocation - The System, County Employees Retirement System, and State Police Retirement System are collectively administered by Kentucky Retirement Systems. Administrative and investment expenses of Kentucky Retirement Systems are allocated in proportion to the number of active members participating in each plan and the carrying value of plan investments, respectively.

NOTE 2 - DESCRIPTION OF THE PLAN

The Kentucky Employees Retirement System is a defined benefit plan which covers substantially all regular full-time employees of any state department, board, or agency directed by Executive Order to participate in the System. The Plan provides for retirement, disability and death benefits. The number of participating state employers was 283 at June 30, 1990.

KENTUCKY EMPLOYEES RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 2 - DESCRIPTION OF THE PLAN (CONTINUED)

For the years ended June 30, 1990 and 1989, participating employees contributed 5% of creditable compensation to the System. Members occupying hazardous positions, as defined by statute, contribute at the rate of 7% of creditable compensation. Employer contribution rates are intended to fund the System's normal cost on a current basis plus one percent (1%) of unfunded past service costs per annum plus interest at the actuarial assumed rate. Such contribution rates are determined by the Board of Trustees of Kentucky Retirement Systems each biennium. Participating employers contributed 7.45% and 14%, respectively, of members' non-hazardous and hazardous compensation for both years.

Vesting in a retirement benefit begins immediately upon entry into the System. The participant has a fully vested interest after the completion of sixty months of service, twelve of which are current service. At a minimum, terminated employees are refunded their contributions with credited interest at 3% compounded annually through June 30, 1981, 6% thereafter through June 30, 1986 and 4% thereafter.

At June 30, membership in the System consisted of:

| | 1990 | 1989 |
|-----------------------------------------------------------------------------------------------------------------------------------|--------|--------|
| Retirees and beneficiaries currently receiving benefits and terminated employees entitled to benefits but not yet receiving them: | | |
| Non-hazardous positions | 25,622 | 25,012 |
| Hazardous positions | 280 | 243 |
| Total | 25,902 | 25,255 |
| Current employees: | | |
| Vested: | | |
| Non-hazardous positions | 27,622 | 26,587 |
| Hazardous positions | 326 | 622 |
| Nonvested: | | |
| Non-hazardous positions | 17,229 | 17,153 |
| Hazardous positions | 275 | 1 |
| Total | 45,452 | 44,363 |

Further information regarding the plan agreement and the vesting and benefit provisions is contained in the pamphlet Summary Plan Description. Copies of this pamphlet are available from the office of Kentucky Retirement Systems.

YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 3 - ACCUMULATED BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who are deceased, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' average compensation during their five highest paid years. Accumulated plan benefits for active employees are based on their compensation as of the valuation date. Benefits payable under all circumstances - retirement, death, and termination of employment - are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The System's consulting actuary, William M. Mercer-Meidinger-Hansen, Inc., estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (taking into account mortality) between the valuation date and the expected date of payment.

| | 1990 | 1989 |
|-------------------------------------------|--------------------|--------------------|
| Vested benefits: | | |
| Participants currently receiving payments | \$ 852,732,707 | \$ 729,486,545 |
| Other participants | <u>429,028,918</u> | <u>324,210,074</u> |
| | \$1,281,761,625 | \$1,053,696,619 |
| Non-vested benefits | <u>127,433,860</u> | <u>94,169,162</u> |
| Total accumulated plan benefits | \$1,409,195,485 | \$1,147,865,781 |

The more significant assumptions underlying the actuarial computations, including those which enter only into the determination of funding levels (cost method, turnover, retirement age, and salary increase), are as follows:

| | |
|---------------------------------------|----------------------------------------------------------------------------------------------------------------------------|
| Actuarial cost method | - Entry age normal cost method |
| Assumed rate of return on investments | - 8% per annum |
| Mortality basis | - 1983 Group Annuity Mortality Table, plus a pre-retirement duty death rate of .0005 per year for hazardous duty employees |
| Employee turnover | - Graduated select and ultimate rates based on 1989 experience study |

KENTUCKY EMPLOYEES RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 3 - ACCUMULATED BENEFITS (CONTINUED)

| | |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| Retirement age | - Based upon experience, with 20% weight, at age 55-64, to the earliest age at which an employee could retire with 100% of the accrued benefits |
| Salary increase | - 6 1/2% per annum |

NOTE 4 - FUNDING STATUS AND PROGRESS

The amount shown below as "pension benefit obligation" is a standardized disclosure measure of the present value of pension benefits, adjusted for the effects of projected salary increases, estimated to be payable in the future as a result of employee service to date. The measure is the actuarial present value of credited projected benefits and is intended to help users assess the System's funding status on a going-concern basis, assess progress made in accumulating sufficient assets to pay benefits when due, and make comparisons among public employee retirement systems (PERS). The measure is independent of the actuarial funding method used to determine contributions to the System.

The pension benefit obligation for 1990 and 1989 was determined as part of an actuarial valuation at June 30, 1990 and 1989, respectively. The significant actuarial assumptions are the same as those used for the accumulated plan benefits computations for those years.

The unfunded (funds in excess of) pension benefit obligation were \$70,061,661 and \$(21,685,920) at June 30, 1990 and 1989, respectively.

| | 1990 | 1989 |
|-------------------------------------------------------------------------------------------------------------|----------------------|----------------------|
| Pension benefit obligation: | | |
| Retirees and beneficiaries currently receiving benefits and terminated employees not yet receiving benefits | \$ 852,732,707 | \$ 729,486,545 |
| Current members - | | |
| Accumulated employee contributions and credited interest | 341,194,364 | 301,612,058 |
| Employer-financed vested | 647,452,102 | 511,218,737 |

KENTUCKY EMPLOYEES RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 5 - CONTRIBUTIONS REQUIRED AND CONTRIBUTIONS MADE

The System's funding policy provides for periodic employer contributions at actuarially determined rates that, expressed as percentages of annual covered payroll, are sufficient to accumulate sufficient assets to pay benefits when due. Level percentage of payroll employer contribution rates are determined using the entry age actuarial funding method. The System also uses the level percentage of payroll method to amortize the unfunded liability.

Actuarially determined contribution requirements of \$97,719,240 (\$56,519,868 employer and \$41,199,372 employee) for the years ended June 30, 1990 and \$93,257,787 (\$53,053,294 employer and \$40,204,493 employee) for the year ended June 30, 1989 were determined through an actuarial valuation performed at June 30, 1989 and 1988, respectively. These contributions were to consist of: (a) \$69,467,953 for 1990 and \$67,588,428 for 1989 normal cost; (b) \$13,139,894 for 1990 and \$12,211,861 for 1989 amortization of the unfunded actuarial accrued liability; (c) \$1,523,808 for 1990 and \$1,459,536 for 1989 administrative expenses; and (d) \$13,587,585 for 1990 and \$11,997,962 for 1989 group hospital and medical insurance premiums. For 1990, contributions received totaled \$113,863,551 of which the employer portion was \$68,593,246 (7.45% of the covered payroll for non-hazardous positions and 14% for hazardous positions) and the employee portion was \$45,270,305 (5% of the covered payroll for non-hazardous positions and 7% for hazardous positions). For 1989 contributions received totaled \$122,316,700 of which the employer portion was \$78,673,797 (7.45% of the covered payroll for non-hazardous positions and 14% for hazardous positions) and employee portion was \$43,642,903 (5% of the covered payroll for non-hazardous positions and 7% for hazardous positions).

The 1988 General Assembly acted to reduce contributions to the Retirement Systems by \$1.8 million for the fiscal year ended June 30, 1989 and \$1.5 million for the fiscal year ended June 30, 1990. This reduction was effected by returning a portion of employer contributions and the Commonwealth's General Fund. The amount of the reduction was allocated between the Kentucky Employees Retirement System and the State Police Retirement System based upon each system's relative percentage of covered payroll. This resulted in the Kentucky Employees Retirement System returning \$1,394,375 and \$1,743,000 of employer contributions to the General Fund of the Commonwealth of Kentucky for the years ended June 30, 1990 and 1989, respectively.

The Appropriations Act of 1990 enacted by the 1990 General Assembly reversed the 1988 General Assembly by acting to return the funds appropriated from the systems with interest added thereon. Effective June 30, 1990, the System received \$3,543,708 of the appropriations which had been withheld over the past two years.

NOTE 6 - SEVEN-YEAR HISTORICAL TREND INFORMATION

Seven-year historical trend information designed to provide information about the System's progress in accumulating sufficient assets to pay benefits when due is presented below.

Analysis of Funding Progress

| Fiscal Year | (1) Net Assets Available For Benefits | (2) Pension Benefit Obligation | (3) Percentage Funded (1) - (2) | (4) Unfunded (Funds in Excess of) Pension Benefit Obligation (2) - (1) | (5) Annual Covered Payroll | (6) Unfunded Pension Benefit Obligation as a Percentage of Covered Payroll (4) - (5) |
|-------------|------------------------------------------|-----------------------------------|---------------------------------------|------------------------------------------------------------------------------|-------------------------------|--------------------------------------------------------------------------------------------|
| 1984 | \$ 814,553,823 | \$ 900,125,692 | 90.5% | \$85,571,869 | \$627,726,168 | 13.6% |
| 1985 | 934,480,773 | 982,009,399 | 95.2 | 47,528,626 | 676,557,336 | 7.0 |
| 1986 | 1,079,353,421 | 1,110,593,823 | 97.2 | 31,240,402 | 713,878,356 | 4.4 |
| 1987 | 1,264,000,419 | 1,238,746,096 | 102.0 | (25,254,323) | 757,822,116 | N/A |
| 1988 | 1,426,056,402 | 1,400,013,802 | 101.9 | (26,042,600) | 803,594,136 | N/A |
| 1989 | 1,588,609,098 | 1,566,923,178 | 101.4 | (21,685,920) | 822,362,508 | N/A |
| 1990 | 1,799,321,738 | 1,869,383,399 | 96.3 | 70,061,661 | 869,109,220 | 8.1 |

Analysis of the dollar amounts of net assets available for benefits, pension benefit obligation, and unfunded (funds in excess of) pension benefit obligation in isolation can be misleading. Expressing the net assets available for benefits as a percentage of the pension benefit obligation provides one indication of the System's funding status on a going-concern basis. Analysis of this percentage over time indicates whether the System is becoming financially stronger or weaker. Generally, the greater this percentage, the stronger the PERS. Trends in unfunded pension benefit obligation and annual covered payroll are both affected by inflation. Expressing the unfunded pension benefit obligation as a percentage of annual covered payroll approximately adjusts for the effects of inflation and aids analysis of the System's progress made in accumulating sufficient assets to pay benefits when due. Generally, the smaller this percentage, the stronger the PERS.

Revenues by Source

| Fiscal Year | Employee Contributions | Employer Contributions | Investment Income | Other Income | Total |
|-------------|------------------------|------------------------|-------------------|--------------|---------------|
| 1984 | \$26,075,180 | \$46,925,821 | \$68,498,499 | \$ 5,812,966 | \$147,312,466 |
| 1985 | 27,760,271 | 49,189,066 | 78,509,704 | 12,959,165 | 168,418,206 |
| 1986 | 29,228,638 | 52,686,054 | 84,346,598 | 32,275,130 | 198,536,420 |

NOTE 7 - INVESTMENTS

The Board of Trustees of the System shall give priority to the investment of funds in obligations considered to improve the industrial development and enhance the economic welfare of the Commonwealth. Appointed investment managers use the following guidelines and restrictions in the selection of securities and timing of transactions as long as the security is not a prohibited investment under Kentucky Revised Statutes:

Equity Investments - Investments may be made in common stock, securities convertible into common stock and in preferred stock of publicly traded corporations.

Fixed Income Investments - Publicly traded bonds are to be selected and managed to assure an appropriate balance in quality and maturities consistent with current market and economic conditions. Investments may be made in any U.S. Government issued debt instrument or issued by an agency of the U.S. Government with an initial maturity of over one year and which are guaranteed by the U.S. Government.

Mortgages - Investments may be made in real estate mortgages on a direct issue basis or in the form of mortgage pool instruments guaranteed by an agency of the U.S. Government or by the Commonwealth of Kentucky.

Equity Real Estate - Investments may be made for the purpose of creating a diversified portfolio of income-producing properties with moderate to low levels of risk.

Guaranteed Insurance Contracts - Investments may be made in guaranteed contracts issued by legal reserve life insurance companies authorized to do business in the Commonwealth of Kentucky and such other states as may be required.

KENTUCKY EMPLOYEES RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 7 - INVESTMENTS (CONTINUED)

Mutual Fund Investments - Investments may be made in mutual funds which hold common stocks or fixed income securities.

Cash Equivalent Securities - The following short-term investment vehicles, with the exception of commercial paper which requires specific purchase approval by the Investment Committee, are considered acceptable:

- ° Repurchase Agreements -- Repurchase Agreements which are collateralized by United States Government issues.
- ° U.S. Government Issues -- All obligations of the U.S. Government and its agencies.
- ° Certificates of Deposit -- Investments may be made in only the 25 largest money center banks in the United States (in terms of total assets) or in banks domiciled in the Commonwealth of Kentucky and having capital and unrestricted surplus of at least \$100 million.

The System's investments are categorized below to give an indication of level of risk assumed by the entity at June 30, 1990. Category 1 includes investments that are insured or registered or for which the collateralized securities are held by the System or its agent in the System's name. Category 2 includes uninsured and unregistered investments for which the collateralized securities are held by the broker's or dealer's trust department or agent in the System's name.

Investments at June 30, 1990, include securities loaned under various lending programs.

KENTUCKY EMPLOYEES RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 8 - INCOME TAX STATUS

The Internal Revenue Service has ruled that the Plan qualifies under Section 401(a) of the Internal Revenue Code and is, therefore, not subject to tax under present income tax law.

NOTE 9 - TRANSFERS TO INSURANCE FUND

By action of the 1978 General Assembly, the Kentucky Retirement Systems Insurance Fund was established to provide a group hospital and medical insurance plan for recipients of a retirement allowance from the Kentucky Employees Retirement System. The Insurance Fund is funded by the transfer of a portion of employer contributions to the retirement system. The percentage of creditable compensation transferred to the Insurance Fund by the Kentucky Employees Retirement System was 1.59% and 1.44% for non-hazardous and 5.74% and 5.31% for hazardous positions for the years ended June 30, 1990 and 1989, respectively.

NOTE 10 - RISKS OF LOSS

The System is exposed to various risks of loss related to torts; thefts of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. Under the provisions of the Kentucky Revised Statutes, the Kentucky Board of Claims is vested with full power and authority to investigate, hear proof, and to compensate persons for damages sustained to either person or property as a result of negligence of the agency or any of its employees. Awards are limited to \$100,000 for a single claim and \$250,000 in aggregate per occurrence. Awards and a pro rata share of the operating cost of the Board of Claims are paid from the fund of the agency having a claim or claims before the Board.

Claims made against the Board of Trustees of Kentucky Retirement Systems or any of its staff as a result of actual or alleged breach of fiduciary duty are insured with a commercial insurance policy. Coverage provided is limited to \$3,000,000 per policy with a deductible amount of \$25,000. Defense costs incurred in defending such claims will be paid by the insurance company. However, the total defense cost and claims paid shall not exceed the total aggregate coverage of the policy.

Loss of office furniture and equipment other than computer equipment is insured through the State Fire and Tornado Insurance Fund. That fund provides fire, extended coverage, vandalism, and malicious mischief protection. Coverage is written for 100% of the actual cash value of scheduled equipment less a deductible in the amount of \$250. Losses sustained from causes other than those covered by the State Fire and Tornado Insurance Fund are insured under an inland marine policy purchased from a commercial insurance company.

KENTUCKY EMPLOYEES RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 10 - RISKS OF LOSS (CONTINUED)

Scheduled computer equipment and magnetic media is insured by a commercial insurance policy. This is an all-risk policy written on a replacement cost basis. It covers the perils of flood, earthquake, and mechanical breakdown in addition to other risks that could result in the loss of this equipment.

Claims for job-related illnesses or injuries to employees are insured by the state's self-insured workers' compensation program. Payments approved by the program are not subject to maximum limitations. A claimant may receive reimbursement of all medical expenses related to the illness or injury and up to sixty-six and two-thirds percent (66 2/3%) of wages for temporary disability. Each agency pays premiums based on three years' claims experience and number of covered employees. Claims experience is weighted seventy percent (70%) and number of employees is weighted thirty percent (30%). Expectations of current and future obligations are also factored into the premium calculation.

Only claims pertaining to workers' compensation have been filed during the past three fiscal years. All major claims have been denied. There were seven claims which were appealed to the Kentucky Workers' Compensation Board which were settled during the year with no liability accruing to the System.

COUNTY EMPLOYEES RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Presentation - The financial statements of County Employees Retirement System (the System) are prepared on the accrual basis, and generally conform to the provisions of the National Council on Governmental Accounting Statement 1.

B. Investment Securities - Investments in bonds and first mortgage real estate loans are stated at amortized cost. Discount and premium are amortized using the straight-line method from the date of acquisition to stated or expected maturity. Common stocks, securities purchased under agreement to resell and investment in real estate investment trust are carried at cost.

Net realized gain or loss on investments represents the difference between the proceeds from sale or maturity and the average cost of investments sold or redeemed. Realized gains or losses are also recorded for exchanges of investments, based upon the difference at the time of the exchange between the carrying value and the market value of the investment exchanged.

C. Members' Contribution and Retirement Allowance Accounts - These accounts are funded by contributions and investment income. The Members' Contribution Account represents the accumulation of active members' contributions plus interest credited to members' accounts. The Retirement Allowance Account is comprised of retired members' contribution balances including interest credited thereon and accumulated employer contributions plus cumulative excess of revenues over expenses less interest credited to members' contribution accounts.

Employees are permitted to purchase credits for member service from the date of plan adoption to the participation date of the employer. Receivables for past service credits are amortized in amounts sufficient to fund the related cost plus interest thereon over a period not to exceed thirty years.

D. Expense Allocation - The System, Kentucky Employees Retirement System, and State Police Retirement System are collectively administered by Kentucky Retirement Systems. Administrative and investment expenses of Kentucky Retirement Systems are allocated in proportion to the number of active members participating in each plan and the carrying value of plan investments, respectively.

COUNTY EMPLOYEES RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 2 - DESCRIPTION OF THE PLAN

The County Employees Retirement System is a defined benefit plan which covers substantially all regular full-time employees of each county and school board, and any additional local agencies electing to participate in the System. The Plan provides for retirement, disability and death benefits. At June 30, 1990, the number of participating local government employers was:

| | |
|---------------------|------------|
| Boards of Education | 176 |
| County agencies | 180 |
| City agencies | 138 |
| Libraries | 69 |
| Other | 267 |
| Total | <u>830</u> |

For the years ended June 30, 1990 and 1989, participating employees contributed 4.25% of creditable compensation to the System. Members occupying hazardous positions, as defined by statute, contribute at the rate of 7% of creditable compensation. Employer contribution rates are intended to fund the System's normal cost on a current basis plus one percent (1%) of unfunded past service costs per annum plus interest at the actuarial assumed rate. Such contribution rates are determined by the Board of Trustees of Kentucky Retirement Systems each biennium. Participating employers contributed 5.75% and 14%, respectively, of members' non-hazardous and hazardous compensation through July 31, 1989. Employers' contribution for non-hazardous compensation increased to 6.35% after this date while the contribution percentage for hazardous compensation remained constant.

Vesting in a retirement benefit begins immediately upon entry into the System. The participant has a fully vested interest after the completion of sixty months of service, twelve of which are current service. At a minimum, terminated employees are refunded their contributions with credited interest at 3% compounded annually through June 30, 1981, 6% thereafter through June 30, 1986 and 4% thereafter.

At June 30, membership in the System consisted of:

| | 1990 | 1989 |
|-----------------------------------------------------------------------------------------------------------------------------------|---------------|---------------|
| Retirees and beneficiaries currently receiving benefits and terminated employees entitled to benefits but not yet receiving them: | | |
| Non-hazardous positions | 21,295 | 19,667 |
| Hazardous positions | 929 | 697 |
| Total | <u>22,224</u> | <u>20,364</u> |

COUNTY EMPLOYEES RETIREMENT SYSTEM

NOTE 2 - DESCRIPTION OF THE PLAN (CONTINUED)

| | 1990 | 1989 |
|-------------------------|--------|--------|
| Current employees: | | |
| Vested: | | |
| Non-hazardous positions | 24,756 | 24,054 |
| Hazardous positions | 2,592 | 2,441 |
| Nonvested: | | |
| Non-hazardous positions | 23,814 | 23,149 |
| Hazardous positions | 1,866 | 1,461 |
| Total | 53,028 | 51,105 |

Further information regarding the plan agreement and the vesting and benefit provisions is contained in the pamphlet Summary Plan Description. Copies of this pamphlet are available from the office of Kentucky Retirement Systems.

NOTE 3 - ACCUMULATED BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who are deceased, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' average compensation during their five highest paid years. Accumulated plan benefits for active employees are based on their compensation as of the valuation date. Benefits payable under all circumstances - retirement, death, and termination of employment - are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The System's consulting actuary, William M. Mercer-Meidinger-Hansen, Inc., estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (taking into account mortality) between the valuation date and the expected date of payment.

COUNTY EMPLOYEES RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 3 - ACCUMULATED BENEFITS (CONTINUED)

Accumulated plan benefit information follows:

| | June 30 | |
|-------------------------------------------|--------------------|--------------------|
| | 1990 | 1989 |
| Vested benefits: | | |
| Participants currently receiving payments | \$435,942,284 | \$320,814,106 |
| Other participants | <u>379,941,521</u> | <u>283,117,906</u> |
| | \$815,883,805 | \$603,932,012 |
| Non-vested benefits | <u>131,999,165</u> | <u>104,013,480</u> |
| Total accumulated plan benefits | \$947,882,970 | \$707,945,492 |

The more significant assumptions underlying the actuarial computations, including those which enter only into the determination of funding levels (cost method, turnover, retirement age, and salary increase), are as follows:

| | |
|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| Actuarial cost method | - Entry age normal cost method |
| Assumed rate of return on investments | - 8% per annum |
| Mortality basis | - 1983 Group Annuity Mortality Table, plus a pre-retirement duty death rate of .0005 per year for hazardous duty employees |
| Employee turnover | - Graduated select and ultimate rates based on 1989 experience study |
| Retirement age | - Based upon experience, with 20% weight, at age 55-64, to the earliest age at which an employee could retire with 100% of the accrued benefits |
| Salary increase | - 6 1/2% per annum |

NOTE 4 - FUNDING STATUS AND PROGRESS

The amount shown below as "pension benefit obligation" is a standardized disclosure measure of the present value of pension benefits, adjusted for the effects of projected salary increases, estimated to be payable in the future as a result of employee service to date. The measure is the actuarial present value of credited projected benefits and is intended to help users assess the System's funding status on a going-concern basis, assess progress made in accumulating sufficient assets to pay benefits when due, and make comparisons among public employee retirement systems (PERS). The measure is independent of the actuarial funding method used to determine contributions to the System.

COUNTY EMPLOYEES RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 4 - FUNDING STATUS AND PROGRESS (CONTINUED)

The pension benefit obligation for 1990 and 1989 was determined as part of an actuarial valuation at June 30, 1990 and 1989, respectively. The significant actuarial assumptions are the same as those used for the accumulated plan benefits computations for those years.

The unfunded (funds in excess of) pension benefit obligation were \$29,153,595 and \$(69,210,146) at June 30, 1990 and 1989, respectively.

| | 1990 | 1989 |
|-------------------------------------------------------------------------------------------------------------|----------------------|----------------------|
| Pension benefit obligation: | | |
| Retirees and beneficiaries currently receiving benefits and terminated employees not yet receiving benefits | \$ 435,942,284 | \$ 320,814,106 |
| Current members - | | |
| Accumulated employee contributions and credited interest | 242,006,912 | 216,056,348 |
| Employer-financed vested | 571,893,807 | 435,891,838 |
| Employer-financed nonvested | <u>49,376,859</u> | <u>36,080,197</u> |
| Total pension benefit obligation | \$1,299,219,862 | \$1,008,842,489 |
| Net assets available for benefits, at cost | <u>1,270,066,267</u> | <u>1,078,052,635</u> |
| Unfunded (funds in excess of) pension benefit obligation | \$ 29,153,595 | \$ (69,210,146) |

NOTE 5 - CONTRIBUTIONS REQUIRED AND CONTRIBUTIONS MADE

The System's funding policy provides for periodic employer contributions at actuarially determined rates that, expressed as percentages of annual covered payroll, are sufficient to accumulate sufficient assets to pay benefits when due. Level percentage of payroll employer contribution rates are determined using the entry age actuarial funding method. The System also uses the level percentage of payroll method to amortize the unfunded liability.

COUNTY EMPLOYEES RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 5 - CONTRIBUTIONS REQUIRED AND CONTRIBUTIONS MADE (CONTINUED)

Actuarially determined contribution requirements of \$90,206,215 (\$56,902,021 employer and \$33,304,194 employee) for the years ended June 30, 1990 and \$67,410,275 (\$40,350,685 employer and \$27,059,590 employee) for the year ended June 30, 1989 were determined through an actuarial valuation performed at June 30, 1989 and 1988, respectively. These contributions were to consist of: (a) \$73,047,371 for 1990 and \$58,850,265 for 1989 normal cost; (b) \$3,223,433 for 1990 and \$(920,931) for 1989 amortization of the unfunded actuarial accrued liability; (c) \$1,619,046 for 1990 and \$1,550,757 for 1989 administrative expenses; and (d) \$12,316,365 for 1990 and \$7,930,184 for 1989 group hospital and medical insurance premiums. For 1990, contributions received totaled \$122,308,422 of which the employer portion was \$80,658,140 (6.35% of the covered payroll for non-hazardous positions and 14% for hazardous positions) and the employee portion was \$41,650,282 (4.25% of the covered payroll for non-hazardous positions and 7% for hazardous positions). For 1989 contributions received totaled \$204,269,561 of which the employer portion was \$140,659,744 (6.35% of the covered payroll for non-hazardous positions and 14% for hazardous positions) and the employee portion was \$63,609,817 (4.25% of the covered payroll for non-hazardous positions and 7% for hazardous positions).

NOTE 6 - SEVEN-YEAR HISTORICAL TREND INFORMATION

Seven-year historical trend information designed to provide information about the System's progress in accumulating sufficient assets to pay benefits when due is presented below.

Analysis of Funding Progress

COUNTY EMPLOYEES RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 6 - SEVEN-YEAR HISTORICAL TREND INFORMATION (CONTINUED)

Analysis of the dollar amounts of net assets available for benefits, pension benefit obligation, and unfunded (funds in excess of) pension benefit obligation in isolation can be misleading. Expressing the net assets available for benefits as a percentage of the pension benefit obligation provides one indication of the System's funding status on a going-concern basis. Analysis of this percentage over time indicates whether the System is becoming financially stronger or weaker. Generally, the greater this percentage, the stronger the PERS. Trends in unfunded pension benefit obligation and annual covered payroll are both affected by inflation. Expressing the unfunded pension benefit obligation as a percentage of annual covered payroll approximately adjusts for the effects of inflation and aids analysis of the System's progress made in accumulating sufficient assets to pay benefits when due. Generally, the smaller this percentage, the stronger the PERS.

| Fiscal Year | Revenues by Source | | | | |
|----------------|---------------------------|---------------------------|----------------------|-----------------|---------------|

NOTE 7 - INVESTMENTS

The Board of Trustees of the System shall give priority to the investment of funds in obligations considered to improve the industrial development and enhance the economic welfare of the Commonwealth. Appointed investment managers use the following guidelines and restrictions in the selection of securities and timing of transactions as long as the security is not a prohibited investment under Kentucky Revised Statutes:

Equity Investments - Investments may be made in common stock, securities convertible into common stock and in preferred stock of publicly traded corporations.

Fixed Income Investments - Publicly traded bonds are to be selected and managed to assure an appropriate balance in quality and maturities consistent with current market and economic conditions. Investments may be made in any U.S. Government issued debt instrument or issued by an agency of the U.S. Government with an initial maturity of over one year and which are guaranteed by the U.S. Government.

Mortgages - Investments may be made in real estate mortgages on a direct issue basis or in the form of mortgage pool instruments guaranteed by an agency of the U.S. Government or by the Commonwealth of Kentucky.

Equity Real Estate - Investments may be made for the purpose of creating a diversified portfolio of income-producing properties with moderate to low levels of risk.

Guaranteed Insurance Contracts - Investments may be made in guaranteed contracts issued by legal reserve life insurance companies authorized to do business in the Commonwealth of Kentucky and such other states as may be required.

Mutual Fund Investments - Investments may be made in mutual funds which hold common stocks or fixed income securities.

Cash Equivalent Securities - The following short-term investment vehicles, with the exception of commercial paper which requires specific purchase approval by the Investment Committee, are considered acceptable:

- ° Repurchase Agreements -- Repurchase Agreements which are collateralized by United States Government issues.
- ° U.S. Government Issues -- All obligations of the U.S. Government and its agencies.
- ° Certificates of Deposits -- Investments may be made in only the 25 largest money center banks in the United States (in terms of total assets) or in banks domiciled in the Commonwealth of Kentucky and having capital and unrestricted surplus of at least \$100 million.

NOTE 7 - INVESTMENTS (CONTINUED)

The System's investments are categorized below to give an indication of level of risk assumed by the entity at June 30, 1990. Category 1 includes investments that are insured or registered or for which the collateralized securities are held by the System or its agent in the System's name. Category 2 includes uninsured and unregistered investments for which the collateralized securities are held by the broker's or dealer's trust department or agent in the System's name.

Investments at June 30, 1990, include securities loaned under various lending programs.

NOTE 8 - INCOME TAX STATUS

The Internal Revenue Service has ruled that the Plan qualifies under Section 401(a) of the Internal Revenue Code and is, therefore, not subject to tax under present income tax law.

NOTE 9 - TRANSFERS TO INSURANCE FUND

By action of the 1978 General Assembly, the Kentucky Retirement Systems Insurance Fund was established to provide a group hospital and medical insurance plan for recipients of a retirement allowance from the County Employees Retirement System. The Insurance Fund is funded by the transfer of a portion of employer contributions to the retirement system. The percentage of creditable compensation transferred to the Insurance Fund by the County Employees Retirement System was 1.21% and 1.07% for non-hazardous and 4.65% and 4.21% for hazardous positions for the years ended June 30, 1990 and 1989, respectively.

COUNTY EMPLOYEES RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 10 - RISKS OF LOSS

The System is exposed to various risks of loss related to torts; thefts of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. Under the provisions of the Kentucky Revised Statutes, the Kentucky Board of Claims is vested with full power and authority to investigate, hear proof, and to compensate persons for damages sustained to either person or property as a result of negligence of the agency or any of its employees. Awards are limited to \$100,000 for a single claim and \$250,000 in aggregate per occurrence. Awards and a pro rata share of the operating cost of the Board of Claims are paid from the fund of the agency having a claim or claims before the Board.

Claims made against the Board of Trustees of Kentucky Retirement Systems or any of its staff as a result of actual or alleged breach of fiduciary duty are insured with a commercial insurance policy. Coverage provided is limited to \$3,000,000 per policy with a deductible amount of \$25,000. Defense costs incurred in defending such claims will be paid by the insurance company. However, the total defense cost and claims paid shall not exceed the total aggregate coverage of the policy.

Loss of office furniture and equipment other than computer equipment is insured through the State Fire and Tornado Insurance Fund. That fund provides fire, extended coverage, vandalism, and malicious mischief protection. Coverage is written for 100% of the actual cash value of scheduled equipment less a deductible in the amount of \$250. Losses sustained from causes other than those covered by the State Fire and Tornado Insurance Fund are insured under an inland marine policy purchased from a commercial insurance company.

Scheduled computer equipment and magnetic media is insured by a commercial insurance policy. This is an all-risk policy written on a replacement cost basis. It covers the perils of flood, earthquake, and mechanical breakdown in addition to other risks that could result in the loss of this equipment.

Claims for job-related illnesses or injuries to employees are insured by the state's self-insured workers' compensation program. Payments approved by the program are not subject to maximum limitations. A claimant may receive reimbursement of all medical expenses related to the illness or injury and up to sixty-six and two-thirds percent (66 2/3%) of wages for temporary disability. Each agency pays premiums based on three years' claims experience and number of covered employees. Claims experience is weighted seventy percent (70%) and number of employees is weighted thirty percent (30%). Expectations of current and future obligations are also factored into the premium calculation.

STATE POLICE RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Presentation - The financial statements of State Police Retirement System (the System) are prepared on the accrual basis, and generally conform to the provisions of the National Council on Governmental Accounting Statement 1.

B. Investment Securities - Investments in bonds and first mortgage real estate loans are stated at amortized cost. Discount and premium are amortized using the straight-line method from the date of acquisition to stated or expected maturity. Common stocks, securities purchased under agreement to resell and investment in real estate investment trust are carried at cost.

Net realized gain or loss on investments represents the difference between the proceeds from sale or maturity and the average cost of investments sold or redeemed. Realized gains or losses are also recorded for exchanges of investments, based upon the difference at the time of the exchange between the carrying value and the market value of the investment exchanged.

C. Members' Contribution and Retirement Allowance Accounts - These accounts are funded by contributions and investment income. The Members' Contribution Account represents the accumulation of active members' contributions plus interest credited to members' accounts. The Retirement Allowance Account is comprised of retired members' contribution balances including interest credited thereon and accumulated employer contributions plus cumulative excess of revenues over expenses less interest credited to members' contribution accounts.

D. Expense Allocation - The System, Kentucky Employees Retirement System, and County Employees Retirement System are collectively administered by Kentucky Retirement Systems. Administrative and investment expenses of Kentucky Retirement Systems are allocated in proportion to the number of active members participating in each plan and the carrying value of plan investments, respectively.

NOTE 2 - DESCRIPTION OF THE PLAN

The State Police Retirement System is a defined benefit plan which covers substantially all regular full-time officers of the Kentucky State Police. The Plan provides for retirement, disability and death benefits.

Participating employees generally contribute 7% of creditable compensation to the System. Employer contribution rates are intended to fund the System's normal cost on a current basis and one percent (1%) of unfunded past service costs per annum plus interest at the actuarial assumed rate. Such contribution rates are determined by the Board of Trustees of Kentucky Retirement Systems each biennium. For the years ended June 30, 1990 and 1989, the employer contributed 18.25% of members' compensation.

STATE POLICE RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 2 - DESCRIPTION OF THE PLAN (CONTINUED)

Vesting in a retirement benefit begins immediately upon entry into the System. The participant has a fully vested interest after the completion of sixty months of service, twelve of which are current service. At a minimum, terminated employees are refunded their contributions with credited interest at 3% compounded annually through June 30, 1981, 6% thereafter through June 30, 1986 and 4% thereafter.

At June 30, membership in the System consisted of:

| | 1990 | 1989 |
|----------------------------------------------------------------------------------------------------------------------------------|------|------|
| Retirees and beneficiaries currently receiving benefits and terminated employees entitled to benefits but not yet receiving them | 512 | 486 |
| Current employees: | | |
| Vested | 734 | 688 |
| Nonvested | 230 | 204 |
| Total | 964 | 892 |

Further information regarding the plan agreement and the vesting and benefit provisions is contained in the pamphlet Summary Plan Description. Copies of this pamphlet are available from the office of Kentucky Retirement Systems.

NOTE 3 - ACCUMULATED BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who are deceased, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' average compensation during their five highest paid years. Accumulated plan benefits for active employees are based on their compensation as of the valuation date. Benefits payable under all circumstances - retirement, death, and termination of employment - are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The System's consulting actuary, William M. Mercer-Meidinger-Hansen, Inc., estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (taking into account mortality) between the valuation date and the expected date of payment.

STATE POLICE RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 3 - ACCUMULATED BENEFITS (CONTINUED)

Accumulated plan benefit information follows:

| | June 30 | |
|-------------------------------------------|-------------------|-------------------|
| | 1990 | 1989 |
| Vested benefits: | | |
| Participants currently receiving payments | \$ 79,650,994 | \$ 70,425,803 |
| Other participants | <u>28,149,029</u> | <u>21,293,699</u> |
| | \$107,800,023 | \$ 91,719,502 |
| Non-vested benefits | <u>16,059,534</u> | <u>12,762,619</u> |
| Total accumulated plan benefits | \$123,859,557 | \$104,482,121 |

The more significant assumptions underlying the actuarial computations, including those which enter only into the determination of funding levels (cost method, turnover, retirement age, and salary increase), are as follows:

| | |
|---------------------------------------|--------------------------------------------------------------------------------------------------|
| Actuarial cost method | - Entry age normal cost method |
| Assumed rate of return on investments | - 8% per annum |
| Mortality basis | - 1983 Group Annuity Mortality Table, plus a pre-retirement duty death rate of .0005 per year |
| Employee turnover | - Graduated rates based on 1989 experience study |
| Retirement age | - 50% will retire as soon as eligible for unreduced benefits and balance will continue to age 55 |
| Salary increase | - 6 1/2% per annum |

NOTE 4 - FUNDING STATUS AND PROGRESS

The amount shown below as "pension benefit obligation" is a standardized disclosure measure of the present value of pension benefits, adjusted for the effects of projected salary increases, estimated to be payable in the future as a result of employee service to date. The measure is the actuarial present value of credited projected benefits and is intended to help users assess the System's funding status on a going-concern basis, assess progress made in accumulating sufficient assets to pay benefits when due, and make comparisons among public employee retirement systems (PERS). The measure is independent of the actuarial funding method used to determine contributions to the System.

STATE POLICE RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 4 - FUNDING STATUS AND PROGRESS (CONTINUED)

The pension benefit obligation for 1990 and 1989 was determined as part of an actuarial valuation at June 30, 1990 and 1989, respectively. The significant actuarial assumptions are the same as those used for the accumulated plan benefits computations for those years.

The unfunded (funds in excess of) pension benefit obligation were \$2,732,886 and \$(1,256,732) at June 30, 1990 and 1989, respectively.

| | 1990 | 1989 |
|-------------------------------------------------------------------------------------------------------------|--------------------|--------------------|
| Pension benefit obligation: | | |
| Retirees and beneficiaries currently receiving benefits and terminated employees not yet receiving benefits | \$ 79,650,994 | \$ 70,425,803 |
| Current members: | | |
| Accumulated employee contributions and credited interest | 21,418,665 | 19,183,040 |
| Employer-financed vested | 45,866,755 | 39,414,309 |
| Employer-financed nonvested | <u>822,023</u> | <u>1,070,669</u> |
| Total pension benefit obligation | \$147,758,437 | \$130,093,821 |
| Net assets available for benefits, at cost | <u>145,025,551</u> | <u>131,350,553</u> |
| Unfunded (funds in excess of) pension benefit obligation | \$ 2,732,886 | \$ (1,256,732) |

NOTE 5 - CONTRIBUTIONS REQUIRED AND CONTRIBUTIONS MADE

The System's funding policy provides for periodic employer contributions at actuarially determined rates that, expressed as percentages of annual covered payroll, are sufficient to accumulate sufficient assets to pay benefits when due. Level percentage of payroll employer contribution rates are determined using the entry age actuarial funding method. The System also uses the level percentage of payroll method to amortize the unfunded liability.

STATE POLICE RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 5 - CONTRIBUTIONS REQUIRED AND CONTRIBUTIONS MADE (CONTINUED)

Actuarially determined contribution requirements of \$6,270,192 (\$4,570,437 employer and \$1,699,755 employee) for the year ended June 30, 1990 and \$5,673,069 (\$4,000,017 employer and \$1,673,052 employee) for the year ended June 30, 1989 were determined through an actuarial valuation performed at June 30, 1990 and 1989, respectively. These contributions were to consist of: (a) \$3,784,452 for 1990 and \$3,722,973 for 1989 normal cost; (b) \$288,020 for 1990 and \$(78,315) for 1989 amortization of the unfunded actuarial accrued liability; (c) \$31,746 for 1990 and \$30,407 for 1989 administrative expenses; and (d) \$2,165,974 for 1990 and \$1,998,004 for 1989 group hospital and medical insurance premiums. For 1990, contributions received totaled \$6,695,314 of which the employer portion was \$4,655,297 (18.25% of the covered payroll) and the employee portion was \$2,040,017 (7% of the covered payroll). For 1989, contributions received totaled \$8,591,381 of which the employer portion was \$6,596,928 (18.25% of the covered payroll) and employee portion was \$1,994,453 (7% of the covered payroll).

The 1988 General Assembly acted to reduce contributions to the Retirement Systems by \$1.8 million for the fiscal year ended June 30, 1989 and \$1.5 million for the fiscal year ended June 30, 1990. This reduction was effected by returning a portion of employer contributions to the Commonwealth's General Fund. The amount of the reduction was allocated between the Kentucky Employees Retirement System and the State Police Retirement System based upon each system's relative percentage of covered payroll. This resulted in the State Police Retirement System returning \$43,125 and \$57,000 of employer contributions to the General Fund of the Commonwealth of Kentucky for the years ended June 30, 1990 and 1989, respectively.

The Appropriations Act of 1990 enacted by the 1990 General Assembly reversed the 1988 General Assembly by acting to return the funds appropriated from the systems with interest added thereon. Effective June 30, 1990, the System received \$112,992 of the appropriations which had been withheld over the past two years.

NOTE 6 - SEVEN-YEAR HISTORICAL TREND INFORMATION

Seven-year historical trend information designed to provide information about the System's progress in accumulating sufficient assets to pay benefits when due is presented below.

Analysis of Funding Progress

| Fiscal Year | (1) Net Assets Available For Benefits | (2) Pension Benefit Obligation | (3) Percentage Funded (1) - (2) | (4) Unfunded (Funds in Excess of) Pension Benefit Obligation (2) - (1) | (5) Annual Covered Payroll | (6) Unfunded Pension Benefit Obligation as a Percentage of Covered Payroll (4) - (5) |
|-------------|------------------------------------------------|-----------------------------------------|------------------------------------------|---------------------------------------------------------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------|
| 1984 | \$ 74,980,517 | \$ 86,051,927 | 87.1% | \$11,071,410 | \$23,718,048 | 46.7% |

(CONTINUED)

NOTE 6 - SEVEN-YEAR HISTORICAL TREND INFORMATION (CONTINUED)

Analysis of the dollar amounts of net assets available for benefits, pension benefit obligation, and unfunded (funds in excess of) pension benefit obligation in isolation can be misleading. Expressing the net assets available for benefits as a percentage of the pension benefit obligation provides one indication of the System's funding status on a going-concern basis. Analysis of this percentage over time indicates whether the System is becoming financially stronger or weaker. Generally, the greater this percentage, the stronger the PERS. Trends in unfunded pension benefit obligation and annual covered payroll are both affected by inflation. Expressing the unfunded pension benefit obligation as a percentage of annual covered payroll approximately adjusts for the effects of inflation and aids analysis of the System's progress made in accumulating sufficient assets to pay benefits when due. Generally, the smaller this percentage, the stronger the PERS.

| Fiscal Year | Revenues by Source | | | | Total |
|----------------|---------------------------|---------------------------|----------------------|-----------------|--------------|
| | Employee Contributions | Employer Contributions | Investment Income | Other Income | |
| 1984 | \$1,695,919 | \$4,446,090 | \$ 6,260,996 | \$ 91,813 | \$12,494,818 |

NOTE 7 - INVESTMENTS

The Board of Trustees of the System shall give priority to the investment of funds in obligations considered to improve the industrial development and enhance the economic welfare of the Commonwealth. Appointed investment managers use the following guidelines and restrictions in the selection of securities and timing of transactions as long as the security is not a prohibited investment under Kentucky Revised Statutes:

STATE POLICE RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 7 - INVESTMENTS (CONTINUED)

Equity Investments - Investments may be made in common stock, securities convertible into common stock and in preferred stock of publicly traded corporations.

Fixed Income Investments - Publicly traded bonds are to be selected and managed to assure an appropriate balance in quality and maturities consistent with current market and economic conditions. Investments may be made in any U.S. Government issued debt instrument or issued by an agency of the U.S. Government with an initial maturity of over one year and which are guaranteed by the U.S. Government.

Mortgages - Investments may be made in real estate mortgages on a direct issue basis or in the form of mortgage pool instruments guaranteed by an agency of the U.S. Government or by the Commonwealth of Kentucky.

Equity Real Estate - Investments may be made for the purpose of creating a diversified portfolio of income-producing properties with moderate to low levels of risk.

Guaranteed Insurance Contracts - Investments may be made in guaranteed contracts issued by legal reserve life insurance companies authorized to do business in the Commonwealth of Kentucky and such other states as may be required.

Mutual Fund Investments - Investments may be made in mutual funds which hold common stocks or fixed income securities.

Cash Equivalent Securities - The following short-term investment vehicles, with the exception of commercial paper which requires specific purchase approval by the Investment Committee, are considered acceptable:

- ° Repurchase Agreements -- Repurchase Agreements which are collateralized by United States Government issues.
- ° U.S. Government Issues -- All obligations of the U.S. Government and its agencies.
- ° Certificates of Deposits -- Investments may be made in only the 25 largest money center banks in the United States (in terms of total assets) or in banks domiciled in the Commonwealth of Kentucky and having capital and unrestricted surplus of at least \$100 million.

NOTE 7 - INVESTMENTS (CONTINUED)

The System's investments are categorized below to give an indication of level of risk assumed by the entity at June 30, 1990. Category 1 includes investments that are insured or registered or for which the collateralized securities are held by the System or its agent in the System's name. Category 2 includes uninsured and unregistered investments for which the collateralized securities are held by the broker's or dealer's trust department or agent in the System's name.

Investments at June 30, 1990, include securities loaned under various lending programs.

NOTE 8 - INCOME TAX STATUS

The Internal Revenue Service has ruled that the Plan qualifies under Section 401(a) of the Internal Revenue Code and is, therefore, not subject to tax under present income tax law.

NOTE 9 - TRANSFERS TO INSURANCE FUND

By action of the 1978 General Assembly, the Kentucky Retirement Systems Insurance Fund was established to provide a group hospital and medical insurance plan for recipients of a retirement allowance from the State Police Retirement System. The Insurance Fund is funded by the transfer of a portion of employer contributions to the retirement system. The percentage of creditable compensation transferred to the Insurance Fund by the State Police Retirement System was 8.92% for the year ended June 30, 1990 and 8.32% for the year ended June 30, 1989.

STATE POLICE RETIREMENT SYSTEM
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 10 - RISKS OF LOSS

The System is exposed to various risks of loss related to torts; thefts of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. Under the provisions of the Kentucky Revised Statutes, the Kentucky Board of Claims is vested with full power and authority to investigate, hear proof, and to compensate persons for damages sustained to either person or property as a result of negligence of the agency or any of its employees. Awards are limited to \$100,000 for a single claim and \$250,000 in aggregate per occurrence. Awards and a pro rata share of the operating cost of the Board of Claims are paid from the fund of the agency having a claim or claims before the Board.

Claims made against the Board of Trustees of Kentucky Retirement Systems or any of its staff as a result of actual or alleged breach of fiduciary duty are insured with a commercial insurance policy. Coverage provided is limited to \$3,000,000 per policy with a deductible amount of \$25,000. Defense costs incurred in defending such claims will be paid by the insurance company. However, the total defense cost and claims paid shall not exceed the total aggregate coverage of the policy.

Loss of office furniture and equipment other than computer equipment is insured through the State Fire and Tornado Insurance Fund. That fund provides fire, extended coverage, vandalism, and malicious mischief protection. Coverage is written for 100% of the actual cash value of scheduled equipment less a deductible in the amount of \$250. Losses sustained from causes other than those covered by the State Fire and Tornado Insurance Fund are insured under an inland marine policy purchased from a commercial insurance company.

Scheduled computer equipment and magnetic media is insured by a commercial insurance policy. This is an all-risk policy written on a replacement cost basis. It covers the perils of flood, earthquake, and mechanical breakdown in addition to other risks that could result in the loss of this equipment.

Claims for job-related illnesses or injuries to employees are insured by the state's self-insured workers' compensation program. Payments approved by the program are not subject to maximum limitations. A claimant may receive reimbursement of all medical expenses related to the illness or injury and up to sixty-six and two-thirds percent (66 2/3%) of wages for temporary disability. Each agency pays premiums based on three years' claims experience and number of covered employees. Claims experience is weighted seventy percent (70%) and number of employees is weighted thirty percent (30%). Expectations of current and future obligations are also factored into the premium calculation.

NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 10 - RISKS OF LOSS (CONTINUED)

Only claims pertaining to workers' compensation have been filed during the past three fiscal years. All major claims have been denied. There were seven claims which were appealed to the Kentucky Workers' Compensation Board which were settled during the year with no liability accruing to the System.

KENTUCKY RETIREMENT SYSTEMS INSURANCE FUND
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989

NOTE 1 - SIGNIFICANT ACCOUNTING POLICY AND DESCRIPTION OF PLAN

The financial statements of the Fund are prepared on the accrual basis.

The Fund was established in 1978 under authority of Kentucky Revised Statutes §67.701 to provide accident and health insurance for members receiving benefits from the Kentucky Employees Retirement System, County Employees Retirement System, and State Police Retirement System (Systems). The Fund and members receiving benefits pay prescribed portions of the aggregate premiums paid to an insurance company for coverage. Insurance premium payments included in the accompanying financial statements represent that portion of premiums paid by the Fund. Insurance premiums withheld from benefit payments to members of the Systems approximated \$5,758,000 and \$5,072,000 for the Kentucky Employees Retirement System, \$3,602,000 and \$2,948,000 for the County Employees Retirement System, and \$44,000 and \$28,000 for the State Police Retirement System in 1990 and 1989, respectively. Effective August 1, 1982, the Retirement System began paying the same proportion of medical insurance premiums for the spouse or beneficiary and dependents of retired hazardous members or hazardous employees killed in the line of duty. The Fund currently pays benefits for 17,000 retirees. The allocation of the insurance premiums paid by the Fund and amounts withheld from members' benefits is based on the years of service with the Systems, as follows:

| <u>Years of Service</u> | <u>Percent Paid by Insurance Fund</u> | <u>Percent Paid by Member through Payroll Deduction</u> |
|-------------------------|---------------------------------------|---------------------------------------------------------|
| 20 | 100% | 0% |
| 15 | 75% | 25% |
| 10 | 50% | 50% |
| 4 | 25% | 75% |
| Less than 4 | 0% | 100% |

The medical insurance contribution rate was originally determined in the 1987 valuation as the level percent of payroll necessary to fund projected medical insurance premiums over the next sixteen years (taking into account the level of reserves in the Insurance Fund). Beginning in 1988, this rate is being increased each year by a percentage amount which will result in reaching the Entry Age Normal funding rate within a 20 year period measured from 1987.

The percentages of employer contributions to the Systems which are in turn transferred to the Fund were actuarially determined as follows:

| | June 30 | |
|--------------------------------------|---------|-------|
| | 1990 | 1989 |
| <u>Non-Hazardous</u> | | |
| Kentucky Employees Retirement System | 1.59% | 1.44% |
| County Employees Retirement System | 1.21% | 1.07% |

KENTUCKY RETIREMENT SYSTEMS INSURANCE FUND

| Total | <u>\$29,868,332</u> | <u>\$24,506,478</u> |

NOTE 2 - FUNDING STATUS

The amount shown below as "medical benefit obligation" is a measure of the present value of medical benefits adjusted for the effects of health costs inflation, estimated to be payable in the future as a result of employee service to date. The measure is the actuarial present value of credited projected benefits and is intended to help users assess the Fund's funding status on a going-concern basis. The medical benefit obligation was determined as part of an actuarial valuation performed as of June 30, 1990. The unfunded medical benefit obligation was \$1,290,553,233 at June 30, 1990.

| | |
|--------------------------------------------|------------------------|
| Medical benefit obligation: | |
| Retirees and beneficiaries | \$ 252,729,333 |
| Active Retirement System members | 1,231,701,112 |
| Total medical benefit obligation | <u>\$1,484,430,445</u> |
| Net assets available for benefits, at cost | <u>68,670,386</u> |
| Unfunded medical benefit obligation | \$1,415,760,059 |

KENTUCKY RETIREMENT SYSTEMS INSURANCE FUND
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 1990 AND 1989
(CONTINUED)

NOTE 2 - FUNDING STATUS (CONTINUED)

The more significant assumptions underlying the actuarial computations are as follows:

| | |
|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| Assumed rate of return on investments | - 8% per annum |
| Mortality basis | - 1983 Group Annuity Mortality Table, plus a pre-retirement duty death rate of .0005 per year for hazardous duty employees |
| Retirement Age | - Based upon experience, with a 20-50% weight, at age 55-64, to the earliest age at which an employee could retire with 100% of the accrued benefits. |
| Health Cost Inflation | - 10% per annum |

NOTE 3 - INVESTMENTS

The Fund has uninsured and unregistered investments for which the securities are held by the broker's or dealer's trust department or agent in Kentucky Retirement System's name. The approximate market value of investments follows:

| | June 30 1990 | 1989 |
|-----------------------------------------------------------------|---------------------|---------------------|
| United States Government securities | \$31,212,000 | \$25,569,000 |
| Government National Mortgage Association and similar securities | 7,953,000 | 4,650,000 |
| Corporate bonds and notes | 7,696,000 | 7,983,000 |
| Securities purchased under agreement to resell | 17,761,000 | 6,057,000 |
| | <u>\$64,622,000</u> | <u>\$44,259,000</u> |

INTRODUCTION TO ACTUARIAL SECTION

An actuarial valuation is a mathematical means of determining liabilities (the cost of benefits guaranteed each member) and the adequateness of the assets and income of the systems. It is a way of looking into the future, based on past experience, to determine if the contributions being paid by the employee and employer, combined with projected investment income, are sufficient to guarantee those benefits to those who are currently members and those who will become members.

Because pension plans, such as those administered by Kentucky Retirement Systems, must necessarily be oriented toward long-range goals, rather than short term receipts and expenses, the actuarial valuation provides the information that the Board of Trustees needs to make sound judgements on investments and benefit improvements. Their decisions can affect the systems' ability to provide not only continuing payments to those currently drawing benefits, but also to provide the necessary assets to guarantee benefit payments to future generations.

The Board's actuarial consultant, the firm of William M. Mercer, Inc., has performed the actuarial valuations for six fiscal years. The firm also conducted the experience study that was used to provide the current actuarial assumptions. Those assumptions were adopted by the Board in December of 1989. The actuarial assumptions are necessary to project the liabilities of the systems.

The normal costs of the systems are being funded as a percent of payroll, as indicated in the report. The remaining unfunded liabilities are being amortized over a 30-year period. This statutory requirement assures that the systems will remain sound, and that current unfunded liabilities will be fully funded in 30 years.

November 2, 1990

Board of Trustees
Kentucky Retirement Systems
Perimeter Park West
1260 Louisville Road
Frankfort, Kentucky 40601

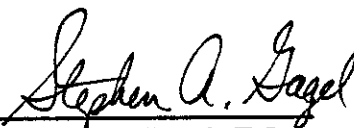

Members of the Board:

The thirty-fourth annual actuarial valuation of the Kentucky Employees Retirement System, the thirty-first annual actuarial valuation of the County Employees Retirement System, and the thirty-second annual actuarial valuation of the State Police Retirement System have been completed and the reports prepared. The valuations were made on the basis of data provided by the Retirement System as of June 30, 1990.

On the basis of the assumptions as stated in each report and the data furnished us by the Administration of the Retirement Systems, it is certified that the valuations have been made by the use of generally accepted actuarial principles and that, if the recommendations of the reports are followed, adequate provision will be made for the funding of future benefits.

The three Retirement Systems are actuarially sound. Adequate provision is being made for the funding of the Actuarial Accrued Liabilities of the Kentucky Employees Retirement System, the County Employees Retirement System, and the State Police Retirement System as required by the Kentucky Revised Statutes, as appropriate funding rates have been established by the Board for this purpose.

Respectfully Submitted,
WILLIAM M. MERCER, INCORPORATED

KENTUCKY EMPLOYEES RETIREMENT SYSTEM

FRANKFORT, KENTUCKY

THE JOURNAL OF THE

ROYAL SOCIETY

OF MEDICINE AND NATURAL HISTORY

OF LONDON

SECTION I
INTRODUCTION

The results of the thirty-fourth annual actuarial valuation of the Kentucky Employees Retirement System are presented in this report. The actuarial valuation was made on the basis of the data provided by the System as of June 30, 1990.

The purpose of the actuarial valuation is to determine the actuarial condition of the Retirement System and the rate of employer contributions for the ensuing fiscal year required to support the System.

The plan provisions utilized in this valuation are described in the Summary of Principal Plan Provisions beginning on page K-41. The basis of funding, as defined in KRS 61.565, provides that the actuarial valuation method is uniform for all benefits provided by the System. The Entry Age Normal Actuarial cost method has been used for all benefits as explained on page K-2. KRS 61.565 provides that each employer participating in the System shall contribute an amount equal to the Normal Cost contribution rate, and an amount sufficient to amortize the Unfunded Actuarial Accrued Liability over 30 years using the level-percentage-of-payroll method. This is the standard used herein to determine whether the funding of the System is adequate.

The actuarial valuation results are based upon the employee census and asset data supplied by the office of the System, and upon the actuarial assumptions as stated on page K-4.

SECTION II

ACTUARIAL CONSIDERATIONS

Description of Actuarial Methods

The actuarial valuation is the means by which the contingent liabilities and contribution rates of a retirement system are evaluated and determined. It provides a guide to the System to the financing required during years of active service to accumulate the funds needed to provide member's benefits. It also makes it possible to estimate beforehand the cost of proposed changes in the System so that action can be taken in the light of the cost consequences.

The methods of valuation are prescribed by KRS 61.565. The Entry Age Normal Actuarial cost method was used to determine costs of all benefits with the exception of the retiree medical insurance benefit. Under this method the employer's contribution to the retirement system consists of Normal Cost, a payment to fund the Unfunded Actuarial Accrued Liability, medical insurance, and administrative expenses. The Normal Cost represents the contribution (as a level percent of payroll) that completely funds benefits at retirement if made from a person's entry into employment until his retirement. The Actuarial Accrued Liability represents the sum of money and investments that would be held in the fund if the retirement system had been in effect since the date each member was first employed.

The medical insurance contribution rate was originally determined in the 1987 valuation as the level percent of payroll necessary to fund projected medical insurance premiums over the next sixteen years (taking into account the level of reserves in the Insurance Fund). Beginning in 1988, this rate is being increased each year by a percentage amount which will result in reaching the Entry Age Normal funding rate within a 20 year period measured from 1987.

The amount of the administrative expense was based on the budgeted amount for the twelve months following the date of the valuation, as allocated between Hazardous position and Non-Hazardous position employees.

Actuarial Assumptions

Since the actuarial valuation involves estimates of benefits payable in the future, it is necessary that assumptions be made as to the interest earnings, rates of mortality, withdrawal, retirement, and disability, and the rate at which salaries will increase. In addition, an assumption must be made relative to increases in medical insurance premium rates in order to value the liability for the medical insurance benefit. It is desirable that the actuarial assumptions be reviewed periodically to see whether past experience and probable future experience justifies the continued use of these actuarial assumptions. Such a study was performed subsequent to the 1989 actuarial valuation and new actuarial assumptions were adopted by the Board for use in the subsequent actuarial valuations, until such time as another experience study is performed. This valuation reflects assumptions based on the 1989

experience study. Actuarial assumptions used for hazardous position employees are similar to actuarial assumptions adopted for the State Police Retirement System (with the exception of the rate of retirement, as indicated on page K-4). The actuarial assumptions applicable to other employees are described on the following page.

Actuarial Value of Assets

The actuarial value of assets is determined using the book value of the assets as of the valuation date, plus accrued investment income and member and employer contributions receivable, less member refunds and investment expenses payable. Except for Table VI, the actuarial value of assets excludes any amounts in the Insurance Fund. Table VI uses only assets in the Insurance Fund, excluding all other amounts.

KENTUCKY EMPLOYEES RETIREMENT SYSTEM

ACTUARIAL ASSUMPTIONS

A. STATEMENT OF ACTUARIAL ASSUMPTIONS

(1) Mortality:

(a) Active & retired lives - 1983 Group Annuity Mortality Table, plus a pre-retirement duty death rate of .0005 per year for hazardous duty employees.

(b) Disabled lives - Social Security Administration Disability Mortality Rates - Actuarial Study No. 75 (current rates used by PBGC for disabled lives receiving Social Security).

(2) Disablement

- Graduated rates based on 1989 experience study.

(3) Termination of employment

- Graduated select (non-hazardous only) and ultimate rates based on 1989 experience study.

(4) Retirement

- Non-Hazardous:

| <u>Age</u> | <u>Retirement Rate</u> |
|------------|------------------------|
| 55-57 | .03 |
| 58-59 | .04 |
| 60-61 | .05 |
| 62 | .25 |
| 63-64 | .10 |
| 65 | .50 |
| 66-67 | .20 |
| 68 | .25 |
| 69 | .40 |
| 70 & Over | 1.00 |

At age 55-64 in lieu of the age related rate, 20% are assumed to retire as soon as eligible for unreduced benefits.

Hazardous: Assumed that 50% will retire as soon as eligible for unreduced benefits and balance will continue to age 60.

- (5) Marital status
- (a) Percentage married - 100%.
 - (b) Age difference - Males are assumed to be 3 years older than their spouses.
- (6) Dependent children - For hazardous position employees under duty related death benefits, it is assumed that the employee is survived by 2 dependent children, each age 6.
- (7) Investment return - 8.00% per year, net of investment related expenses, compounded annually.
- (8) Compensation progression - 6.50% per year, compounded annually.
- (9) Retiree Medical Insurance - It was assumed that future retirees would select medical coverage in the same proportion that current retirees have selected coverage. Monthly premium rates were assumed to be as follows:

| Plan Type | 7/1/90 Rate | Rate Increase | |
|-------------|----------------|---------------|-----------|
| | | Date | Rate |
| Single | \$102.96* | 11/1/90 | \$124.27* |
| Family | 241.66* | 11/1/90 | 261.97* |
| Medicare | 56.35* | 1/1/91 | 61.99** |
| High Option | 84.40* | 1/1/91 | 92.84** |

*Actual rates

**Assumed rates

In determining the medical premium funding rate in 1987, medical premiums were assumed to increase at an annual rate of 12%. In determining the target Entry Age Funding rate in valuations subsequent to 1987, it was assumed that medical premiums would grow at an annual rate of 10%. The assumed rate of growth in number of retirees receiving medical insurance was based on assumed retirement and mortality patterns used throughout the valuation.

Reserves in the Insurance Fund were used to offset the liability for premiums.

(10) Missing data

For those active members with incomplete data, the following assumptions were made:

- . If reported salary was zero or blank, then monthly salary was assumed to be \$556
- . If reported age was blank, then assume current age equal to age 18 plus years of service reported

B. SAMPLE RATES FOR NON-HAZARDOUS POSITION EMPLOYEES*

(1) Annual Rates of Mortality:

| <u>Age</u> | <u>Active Mortality</u> | | <u>Disabled Mortality</u> | |
|------------|-------------------------|----------------|---------------------------|----------------|
| | <u>Males</u> | <u>Females</u> | <u>Males</u> | <u>Females</u> |
| 25 | 0.05% | 0.03% | 4.83% | 2.63% |
| 30 | 0.06 | 0.03 | 3.62 | 2.37 |
| 40 | 0.12 | 0.07 | 2.82 | 2.09 |
| 50 | 0.40 | 0.16 | 3.83 | 2.57 |
| 55 | 0.61 | 0.25 | 4.82 | 2.95 |
| 60 | 0.92 | 0.42 | 6.03 | 3.31 |

(2) Annual Rates of Decrement:

| <u>Age</u> | <u>Disablement</u> | <u>Ultimate Termination</u> |
|------------|--------------------|-----------------------------|
| 25 | 0.02% | 3.00% |
| 30 | 0.03 | 3.00 |
| 40 | 0.07 | 2.50 |
| 50 | 0.28 | 2.00 |
| 55 | 0.53 | 1.50 |
| 60 | 0.93 | 0.25 |

(3) Select Rates of Termination:

| <u>Years of Service</u> | <u>Select Termination</u> |
|-------------------------|---------------------------|
| 1 | 25.0% |
| 2 | 8.0 |
| 3 | 5.0 |
| 4 | 4.0 |
| 5 | 3.5 |

(4) Compensation Progression:

| <u>Age</u> | <u>Rate of Annual Increase</u> | <u>Compensation at Normal Retirement as Percentage Of Current Annual Compensation</u> |
|------------|------------------------------------|-----------------------------------------------------------------------------------------------|
| 25 | 6.50% | 1,241.6% |
| 30 | 6.50 | 906.2 |
| 40 | 6.50 | 482.8 |
| 50 | 6.50 | 257.2 |
| 55 | 6.50 | 187.7 |
| 60 | 6.50 | 137.0 |

*Sample rates for hazardous position employees are included in the State Police Retirement System valuation.

SECTION III

KENTUCKY EMPLOYEES RETIREMENT SYSTEM

RESULTS OF THE 1990 ACTUARIAL VALUATION

Actuarial Balance Sheet

Table I, which follows, is the actuarial balance sheet of the Kentucky Employees Retirement System as of June 30, 1990. The "actuarial balance sheet" of the retirement system displays the fundamental relationship between actual assets, future contributions, and future benefits. The asset side of the balance sheet is comprised of actual fund assets plus the actuarial present value of future contributions on behalf of current members. The actuarial present values of all projected benefit payments to present active and inactive members make up the balance sheet liabilities.

Determination of Contribution Rate

The rate of contribution by the State required to provide 30 year amortization of the Unfunded Actuarial Accrued Liability under the level-percentage-of-payroll method, the employer share of the Normal Cost, medical insurance and the expenses of administration, is shown in Table II. The required contribution is expressed both in dollars and as a percentage of the estimated annual State payroll as of June 30, 1990.

The actuarial methods applied to determine the Normal Cost for the year commencing July 1, 1990 are described on page K-2. These costs are classified by type of benefit. The Normal Cost contribution rate of the State is determined by reducing the total Normal Cost by the expected employee contributions. A breakdown of costs between Hazardous and Non-Hazardous position employees appears in Table III.

Accountant's Information

Table IV contains a calculation of the accumulated value of plan benefits as specified under FASB Statement No. 35. Under this calculation, the present value of future benefits payable and attributable to the employee's present accrued benefit is computed. The probabilities of termination, disability, mortality and retirement are the same for this calculation as those used in the regular valuation calculations. However, future increases in earnings and additional benefit accruals are not projected beyond the current valuation date.

Table V contains information needed to comply under GASB Statement No. 5. These calculations reflect the present value of benefits attributable to current years of service, but based on projected salary levels at the time a member's final benefits are determined.

Table VI contains information needed to comply under GASB Statement No. 12. These calculations reflect the liabilities for the medical premium benefit provided under the system.

KENTUCKY EMPLOYEES RETIREMENT SYSTEM
ACTUARIAL BALANCE SHEET-JUNE 30, 1990

ACTUARIAL ASSETS

| | |
|----------------------------------------------------------|--------------------|
| Fund Assets at Book Value* | \$1,803,051,503 |
| Actuarial Present Value of Future Member Contributions | 559,901,156 |
| Actuarial Present Value of Future Employer Contributions | |
| For Normal Costs | \$ 448,014,732 |
| For Unfunded Actuarial Accrued Liability | <u>256,167,674</u> |
| Total | \$ 704,182,406 |
| Total Actuarial Assets | \$3,067,135,065 |

ACTUARIAL LIABILITIES

| | |
|--------------------------------------------|---------------------|
| Actuarial Present Value of Future Benefits | |
| Inactive Members: | |
| Retired Members and Beneficiaries | \$ 827,243,746 |
| Vested Retirement | 20,291,340 |
| Vested Membership | <u>5,197,621</u> |
| Total - Inactive | \$ 852,732,707 |
| Active Members: | |
| Retirement Benefits | \$1,833,800,491 |
| Disability Benefits | 109,664,456 |
| Withdrawal Benefits (Vested and | |
| Refund of Contributions) | 152,390,971 |
| Survivor Benefits | <u>114,816,675</u> |
| Total - Active | \$2,210,672,593 |
| Refunds and Expenses Payable | <u>\$ 3,729,765</u> |
| Total Actuarial Liabilities | \$3,067,135,065 |

ACCRUED BENEFIT LIABILITY **

| | |
|---------------------|-----------------|
| Vested Benefits | \$1,246,686,693 |
| Non-Vested Benefits | \$ 51,676,216 |

- * The approximate market value of assets as of June 30, 1990 is \$1,989,214,997 (1,954,895,264 for Non-Hazardous and \$34,319,733 for Hazardous).
The actuarial value of assets as of June 30, 1990 is \$1,799,321,738 (book value of assets less refunds and expenses payable).
The Members' Contribution Account as of June 30, 1990 is \$361,738,121.
- ** Present value of accrued benefit deferred to normal retirement date.

SECTION IV

COMMENTS AND CERTIFICATION

Comments

The total Actuarial Accrued Liability has increased from \$1,734,607,903 on June 30, 1989 to \$2,055,489,412 on June 30, 1990. The Unfunded Actuarial Accrued Liability has increased from \$145,998,805 to \$256,167,674. Total actuarial value of assets as of June 30, 1990 was equal to \$1,799,321,738.

The Unfunded Actuarial Accrued Liability increased from 17.75% to 29.48% as a percentage of annual payroll and increased from 8.4% to 12.5% as a percentage of the Actuarial Accrued Liability in the year ended June 30, 1990.

The change in contribution rate between the 1989 and 1990 valuations is a function of actual plan experience. A formal gain and loss analysis would identify the portion of the contribution rate change attributable to each element of plan experience and benefit change. However, undertaking such an analysis would be extremely time consuming and expensive. In lieu of the formal analysis, we have estimated the impact of the various components of gain and loss based on changes in statistical averages of each group. The following table shows the results of this computation:

| | <u>Non-Hazardous Position Employees</u> | <u>Hazardous Position Employees</u> |
|-------------------------------------------------------------------------------------------------------------------|---------------------------------------------|-----------------------------------------|
| June 30, 1989 Contribution Rate | 6.76% | 14.67% |
| Expected Change in Unfunded Actuarial Accrued Liability Payment Due to Increasing Covered Payroll | (0.09%) | 0.03% |
| Change Due to Revision in Actuarial Assumptions | 1.03% | (0.15%) |
| Change Due to Adoption of Level- Percentage-of-Payroll Method of Amortizing Unfunded Actuarial Liability | (1.08%) | 0.07% |
| Increase Expected Due to Legislated Benefit Improvements | | |
| • Increase in Benefit Rate | 0.46% | - |
| • "27 and Out" Benefit | 0.34% | - |
| • Retiree COLA | 0.56% | 0.46% |
| Investment Return | (0.43%) | (0.66%) |
| Salary Increases | (0.09%) | (0.45%) |
| Decrements Experience* | (0.08%) | 0.55% |
| Change in Group Hospital and Medical Premium Rate | 0.18% | 0.43% |

| | | |
|---------------------------------------|-------|--------|
| Change in Administrative Expense Rate | 0.20% | 0.28% |
| June 30, 1990 Contribution Rate | 7.76% | 15.23% |

*Includes mortality, disability, termination of employment and retirement experience.

The annual State contribution rate required to provide the Normal Cost, 30 year amortization of the Unfunded Actuarial Accrued Liability under the level-percentage-of-payroll method, and pay administrative expenses for Non-Hazardous position employees was determined at 5.99%. An additional 1.77% is required to fund medical insurance for retirees, bringing the total required contribution to 7.76%. This exceeds the current 7.45% budgeted contribution rate. As a result of House Bill 799, the General Assembly appropriated \$3,656,700 in funds to be made as an additional contribution to the KERS Non-Hazardous, KERS Hazardous and State Police Retirement Systems. This amount makes up for the budgeted reduction in State funding (plus interest) during the 1988-90 biennium. This additional contribution is to be used to eliminate, if possible, or otherwise reduce the amount of any recommended increase in the contribution rate. The portion of the additional contribution attributable to KERS Non-Hazardous is \$3,487,029. This amount was received by the retirement system on July 2, 1990. During the 1990-91 plan year, \$2,644,377 of the additional amount is needed to make up the difference between the 7.76% contribution rate and the actual amount contributed of 7.45%. With interest adjustment at 8% per annum, this leaves \$1,019,908 at June 30, 1991 to be used to reduce the 1991-92 contribution recommendation. Based on projected payroll on June 30, 1991, this allows a 0.11% reduction in the 1991-92 rate. Reducing the 7.76% valuation rate by 0.11% results in a 7.65% rate. Therefore, it is our opinion that the contribution rate beginning July 1, 1991 should be increased from the current 7.45% level to 7.65%, and we so recommend.

The annual State contribution rate required to provide the Normal Cost, 30 year amortization of the Unfunded Actuarial Accrued Liability under the level-percentage-of-payroll method, and pay administrative expenses for Hazardous position employees was determined at 9.06%. An additional 6.17% is required to fund medical insurance for retirees, bringing the total required contribution to 15.23%. This exceeds the current 15.05% budgeted contribution rate. As noted above, the General Assembly appropriated \$3,656,700 in funds to be made as an additional contribution to the KERS Non-Hazardous, KERS Hazardous and State Police Retirement Systems, such amount to be used to eliminate, if possible, or otherwise reduce the amount of any recommended increase in the contribution rate. The portion of the additional contribution attributable to KERS Hazardous is \$56,679. This amount was received by the retirement system on July 2, 1990. During the 1990-91 plan year, \$22,683 of the additional amount is needed to make up the difference between the 15.23% contribution rate and the actual amount contributed of 15.05%. With interest adjustment at 8% per annum, this leaves \$37,657 at June 30, 1991 to be used to reduce the 1991-92 contribution recommendation. Based on projected payroll on June 30, 1991, this is more than sufficient to allow a 0.18% reduction in the 1991-92 rate. Therefore, it is our opinion that the contribution rate beginning July 1, 1991 should remain at the current 15.05% level, and we so recommend.

The recommended contribution rates are based on current statutory benefits. The budgeted contribution rates will again be reviewed in the June 30, 1991 valuation.

The following table shows the total Actuarial Accrued Liability, the Unfunded Actuarial Accrued Liability, percent unfunded and the growth of the invested assets at selected intervals since the inception of the System.

SECTION VI

SUMMARY OF PRINCIPAL PLAN PROVISIONS

Effective Date

The state of Kentucky established the Kentucky Employees Retirement System in July, 1956. The plan benefits have been improved several times, most recently as of August 1, 1990.

Plan Year

A plan year is a twelve month period beginning on July 1.

Final Compensation

Final compensation is the average salary during the five highest paid fiscal years. If the months of service credit during the highest five year period is less than forty-eight, one or more additional fiscal years shall be used.

Service

Service means the sum of prior service and current service as defined below:

- (a) Prior service is credited for regular full-time employment of at least 100 hours of work per month with a participating agency before July 1, 1956. In some instances prior service credit is granted for time spent in the military.
- (b) Current service is obtained for regular full-time employment which averages at least 100 hours of work per month with participating agencies after July 1, 1956. Current service credit may be granted for military service and educational leaves if special criteria are met.
- (c) Service is increased by unused sick leave, up to a maximum of six months, for purposes of computing eligibility and the amount of benefits.

Eligibility

Any state department, board, or agency shall participate in the System when directed to do so by the Executive Order of the Governor. Membership in the system consists of:

- (a) all persons who become employees of a department after such department first participates,
- (b) all persons who are employees on the date a department first participates and who elect within thirty days to become members and make contributions,

- (c) all persons who are employees of any credit union whose membership is limited to state government employees,
- (d) all persons who were professional staff employees of the Council on Public Higher Education or the Higher Education Assistance Authority and were making contributions to the system on the effective date of their respective Executive Order and filed a written election to continue in the System,
- (e) all persons who were professional staff employees of the Kentucky Authority for Educational Television on or after July 1, 1974,
- (f) members of the General Assembly and Constitutional officers of the General Assembly serving during the January, 1960 session or thereafter, and
- (g) officers and employees of the General Assembly and their assistants if employed by the General Assembly during the January, 1960 session and thereafter, but only after serving during six sessions of the General Assembly.

Normal Retirement Date

A member may elect to retire upon: (1) attaining age 65 for non-hazardous positions, or attaining age 55 for hazardous positions, and (2) having contributed to the System. Upon completion of 27 years of service credit, 15 of which are current service for non-hazardous positions, or completion of 20 years of service credit for hazardous positions, a member may elect to retire with an unreduced benefit.

Early Retirement Date

A member may elect to retire before the normal retirement date at any time after: (1) for non-hazardous positions, attainment of age 55 and completion of 60 months of service credit at least 12 of which are current, or at any age after 25 years of service, or (2) for hazardous positions, attainment of age 50 and completion of 15 years of service credit.

Normal Retirement Benefits

For non-hazardous positions, upon attainment of age 65 and completion of 48 months of service, of which 12 months are current service, a monthly benefit equal to 1.97% of the member's final compensation multiplied by his service will be payable. For hazardous positions, a monthly benefit equal to 2.49% of the member's final compensation multiplied by his service will be payable upon attainment of age 55 and completion of 60 months of service of which 12 months are current service. A member, with less than 48 months for non-hazardous positions or 60 months for hazardous positions, who retires on or after the normal retirement date is entitled to a retirement allowance which pays the actuarial equivalent of twice the member's accumulated contributions for life.

Early Retirement Benefits

A member who elects early retirement is entitled to a monthly benefit reduced for each month by which the early retirement date precedes the first date on which the member would qualify for an unreduced benefit. If a non-hazardous position employee has 27 or more years of service credit, 15 of which are current, or a hazardous position employee has 20 or more years of service credit, an unreduced benefit is payable.

Minimum Benefit

The normal retirement benefit for members with 10 or more years of service, at least one of which is current service, shall not be less than \$512 per year.

Disability Benefits

A member with 60 months of service, 12 of which must be current service, is entitled to a retirement allowance computed in the same manner as the normal retirement benefit with service and final compensation determined as of the disability date. Service credit shall be added on to total service for the period from the last day of paid employment to the 65th birthday (55th for members in a hazardous position) up to a maximum of service credited to the last day of paid employment. Except for members with 25 or more (20 or more for hazardous) years of service on the last day of paid employment, the maximum combined service credit (total service and added service) shall not exceed 25 years (20 years for hazardous members). For non-hazardous position employees with 25 or more years of service credit, additional years of service credit will be added up to a maximum combined limit of 30, or actual service if greater. For hazardous position employees with 20 or more years of service credit, actual service will be used.

A member in a hazardous position who is disabled in the line of duty is entitled to a retirement benefit of not less than 25% of the member's final monthly rate of pay plus 10% of his final monthly rate of pay for each dependent child. The maximum dependent child's benefit is 40% of the member's final monthly rate of pay. A partial disability benefit may be payable to hazardous employees if the disability is not total and permanent. The disability will be reduced to a rate determined by the Board.

Death Benefits

If a member dies prior to retirement, but after 60 months of service, 12 of which are current and who is a contributing member, or after 12 years of service, one of which is current and who is not a contributing member, or after 48 months service if the member is age 65 or over, a benefit will be payable to the beneficiary based on the member's age, years of service and final compensation at the date of death. The benefit will be equal to the amount payable had the employee retired and elected a joint and 100% survivorship payment form.

If a member in a hazardous position dies in the line of duty and has a spouse as beneficiary, a \$5,000 lump sum payment will be made and a benefit of 25% of the member's final monthly rate of pay will be payable until death or remarriage. If the member in a hazardous position dies in the line of duty and has a dependent as beneficiary, a lump sum payment of \$10,000 will be made. Monthly payments shall be made for each dependent child equal to 10% of the member's final monthly rate of pay, but not greater than 40% of the member's final monthly rate of pay. The beneficiary of a hazardous duty member with 5 or more years of service, one of which is current, may elect a death benefit computed in the same manner as a non-hazardous employee using 2.49% rather than 1.97%.

Upon the death of a retired member, who had a minimum of 48 months of service credit, a death benefit of \$2,500 is payable.

Optional Forms of Payment

Joint and survivor annuities which provide a reduced benefit for the life of the member, with the benefit at the same or at a further reduced rate continuing after the member's death until the death of the designated beneficiary may be elected by the member prior to retirement. Other optional forms include a life annuity with 10, 15 or 20 years of payments guaranteed and a Social Security adjustment with or without survivor rights.

Contributions

Members contribute 5% of gross compensation (7% for hazardous positions). On each June 30, interest is credited at the rate to be determined by the Board on the accumulated contributions the member had in his account on the previous June 30. Upon termination a member may withdraw the contributions with interest, but will be entitled to no benefit payments.

Medical Insurance

Recipients of a retirement benefit may elect to participate in a voluntary hospital/medical group insurance plan for themselves as well as any beneficiaries or dependents. The cost of participation for any beneficiaries or dependents is borne by the retiree (except that dependents of hazardous position employees and legislators will have the same percentage paid by the system as the member). The retirement system will pay a portion of the cost of participation for the retiree based on years of service credit as follows:

| | |
|-------------------|------|
| Less than 4 years | 0% |
| 4 - 9 years | 25% |
| 10 - 14 years | 50% |
| 15 - 19 years | 75% |
| 20 or more years | 100% |

If a hazardous member is disabled in the line of duty, the retirement system will pay 100% of the cost of the member, spouse and eligible dependents. If a hazardous member is killed in the line of duty, the retirement system will pay 100% of the cost of the beneficiary and eligible dependents as long as they remain eligible for a monthly benefit payment.

THIRTY-FIRST ANNUAL ACTUARIAL VALUATION

JUNE 30, 1990

COUNTY EMPLOYEES RETIREMENT SYSTEM

FRANKFORT, KENTUCKY

THE UNIVERSITY OF CHICAGO
LIBRARY
540 EAST 57TH STREET
CHICAGO, ILL. 60637

SECTION I

INTRODUCTION

The results of the thirty-first annual actuarial valuation of the County Employees Retirement System are presented in this report. The actuarial valuation was made on the basis of the data provided by the System as of June 30, 1990.

The purpose of the actuarial valuation is to determine the actuarial condition of the Retirement System and the rate of employer contribution for the ensuing fiscal year as required to support the System.

The plan provisions utilized in this valuation are described in the Summary of Principal Plan Provisions beginning on page C-41. The basis of funding is defined in KRS 61.565 and provides that the actuarial valuation method would be uniform for all benefits provided by the System. The Entry Age Normal Actuarial cost method has been used for all benefits. KRS 61.565 provides that each employer participating in the System shall contribute an amount equal to the Normal Cost contribution rate, and an amount sufficient to amortize the Unfunded Actuarial Accrued Liability over 30 years using the level-percentage-of-payroll method, and annual interest at the assumed rate on the Unfunded Actuarial Accrued Liability. This is the standard used herein to determine whether the funding of the System is adequate.

The actuarial valuation results are based upon the employee census and asset data supplied by the office of the System, and upon the actuarial assumptions as stated on page C-4.

SECTION II

ACTUARIAL CONSIDERATIONS

Description of Actuarial Methods

The actuarial valuation is the means by which the contingent liabilities and contribution rates of a retirement system are evaluated and determined. It provides a guide to the System to the financing required during years of active service to accumulate the funds needed to provide members' benefits. It also makes it possible to estimate beforehand the cost of proposed changes in the System so that action can be taken in the light of the cost consequences.

The methods of valuation are prescribed by KRS 61.565. The Entry Age Normal Actuarial cost method was used to determine costs of all benefits with the exception of the retiree medical insurance benefit. Under this method the employer's contribution to the retirement system consists of Normal Cost, a payment to fund the Unfunded Actuarial Accrued Liability, medical insurance, and administrative expenses. The Normal Cost represents the contribution (as a level percent of payroll) that completely funds benefits at retirement if made from a person's entry into employment until his retirement. The Actuarial Accrued Liability represents the sum of money and investments that would be held in the fund if the retirement system had been in effect since the date each member was first employed.

The medical insurance contribution rate was originally determined in the 1987 valuation as the level percent of payroll necessary to fund projected medical insurance premiums over the next sixteen years (taking into account the level of reserves in the Insurance Fund). Beginning in 1988, this rate is being increased each year by a percentage amount which will result in reaching the Entry Age Normal funding rate within a 20 year period measured from 1987.

The amount of the administrative expense was based on the budgeted amount for the twelve months following the date of the valuation as allocated between Hazardous position and Non-Hazardous position employees.

Actuarial Assumptions

Since the actuarial valuation involves estimates of benefits payable in the future, it is necessary that assumptions be made as to the interest earnings, rates of mortality, withdrawal, retirement, and disability, and the rate at which salaries will increase. In addition, an assumption must be made relative to increases in medical insurance premium rates in order to value the liability for the medical insurance benefit.

It is desirable that the actuarial assumptions be reviewed periodically to see whether past experience and probable future experience justifies the continued use of these actuarial assumptions. Such a study was performed subsequent to the 1989 actuarial valuation and new actuarial assumptions were adopted by the Board for use in the subsequent actuarial valuations, until such time as another experience study is performed. This valuation reflects assumptions based on the 1989 experience study. Actuarial assumptions used for hazardous position employees are similar to actuarial assumptions adopted for the State Police Retirement System. The actuarial assumptions applicable to other employees are described on page C-4.

Actuarial Value of Assets

The actuarial value of assets is determined as the book value of the assets as of the valuation date, plus accrued investment income and member and employer contribution receivables, less member refunds and investment expenses payable. Except for Table VI, the actuarial value of assets excludes any amounts in the Insurance Fund. Table VI uses only assets in the Insurance Fund, excluding all other amounts.

COUNTY EMPLOYEES RETIREMENT SYSTEM

ACTUARIAL ASSUMPTIONS

A. STATEMENT OF ACTUARIAL ASSUMPTIONS

(1) Mortality:

(a) Active & retired lives - 1983 Group Annuity Mortality Table, plus a pre-retirement duty death rate of .0005 per year for hazardous duty employees.

(b) Disabled lives - Social Security Administration Disability Mortality Rates - Actuarial Study No. 75 (current rates used by PBGC for disabled lives receiving Social Security).

(2) Disablement - Graduated rates based on 1989 experience study.

(3) Termination of employment - Graduated select (non-hazardous only) and ultimate rates based on 1989 experience study.

(4) Retirement - Non-Hazardous:

| <u>Age</u> | <u>Retirement Rate</u> |
|-------------|------------------------|
| 55-57 | .03 |
| 58-59 | .04 |
| 60-61 | .05 |
| 62 | .25 |
| 63-64 | .10 |
| 65 | .50 |
| 66-67 | .20 |
| 68 | .25 |
| 69 | .40 |
| 70 and Over | 1.00 |

At age 55-64 in lieu of the age related rate, 20% are assumed to retire as soon as eligible for unreduced benefits.

Hazardous: Assumed that 50% will retire as soon as eligible for unreduced benefits and balance will continue to age 55.

- (5) Marital status
- (a) Percentage married - 100%.
 - (b) Age difference - Males are assumed to be 3 years older than their spouses.
- (6) Dependent children - For hazardous position employees under duty related death benefits, it is assumed that the employee is survived by 2 dependent children each age 6.
- (7) Investment return - 8.00% per year, net of investment related expenses, compounded annually.
- (8) Compensation progression - 6.50% per year, compounded annually.
- (9) Retiree Medical Insurance - It was assumed that future retirees would select medical coverage in the same proportion that current retirees have selected coverage. Monthly premium rates were assumed to be as follows:

| Plan Type | 7/1/90 Rate | Rate Increase | |
|-------------|----------------|---------------|-----------|
| | | Date | Rate |
| Single | \$102.96* | 11/1/90 | \$124.27* |
| Family | 241.66* | 11/1/90 | 261.97* |
| Medicare | 56.35* | 1/1/91 | 61.99** |
| High Option | 84.40* | 1/1/91 | 92.84** |

*Actual rates

**Assumed rates

In determining the medical premium funding rate in 1987, medical premiums were assumed to increase at an annual rate of 12%. In determining the target Entry Age Funding rate in valuations subsequent to 1987, it was assumed that medical premiums would grow at an annual rate of 10%. The assumed rate of growth in number of retirees receiving medical insurance was based on assumed retirement and mortality patterns used throughout the valuation.

Reserves in the Insurance Fund were used to offset the liability for premiums.

(10) Missing data

- For those active members with incomplete data, the following assumptions were made:
 - . If reported salary was zero or blank, then monthly salary was assumed to be \$556
 - . If reported age was blank, then assume current age equal to age 18 plus years of service reported

B. SAMPLE RATES FOR NON-HAZARDOUS POSITION EMPLOYEES*

(1) Annual Rates of Mortality:

| <u>Age</u> | <u>Active Mortality</u> | | <u>Disabled Mortality</u> | |
|------------|-------------------------|----------------|---------------------------|----------------|
| | <u>Males</u> | <u>Females</u> | <u>Males</u> | <u>Females</u> |
| 25 | 0.05% | 0.03% | 4.83% | 2.63% |
| 30 | 0.06 | 0.03 | 3.62 | 2.37 |
| 40 | 0.12 | 0.07 | 2.82 | 2.09 |
| 50 | 0.40 | 0.16 | 3.83 | 2.57 |
| 55 | 0.61 | 0.25 | 4.82 | 2.95 |
| 60 | 0.92 | 0.42 | 6.03 | 3.31 |

(2) Annual Rates of Decrement:

| <u>Age</u> | <u>Disablement</u> | <u>Ultimate Termination</u> |
|------------|--------------------|-----------------------------|
| 25 | 0.02% | 3.00% |
| 30 | 0.03 | 3.00 |
| 40 | 0.07 | 2.50 |
| 50 | 0.28 | 2.00 |
| 55 | 0.53 | 1.50 |
| 60 | 0.93 | 0.25 |

(3) Select Rates of Termination:

| <u>Years of Service</u> | <u>Select Termination</u> |
|-------------------------|---------------------------|
| 1 | 25.0% |
| 2 | 8.0 |
| 3 | 5.0 |
| 4 | 4.0 |
| 5 | 3.5 |

(4) Compensation Progression:

| <u>Age</u> | <u>Rate of Annual Increase</u> | <u>Compensation at Normal Retirement as Percentage Of Current Annual Compensation</u> |
|------------|------------------------------------|-----------------------------------------------------------------------------------------------|
| 25 | 6.50% | 1,241.6% |
| 30 | 6.50 | 906.2 |
| 40 | 6.50 | 482.8 |
| 50 | 6.50 | 257.2 |
| 55 | 6.50 | 187.7 |
| 60 | 6.50 | 137.0 |

*Sample rates for hazardous position employees are included in the State Police Retirement System valuation.

SECTION III

COUNTY EMPLOYEES RETIREMENT SYSTEM

RESULTS OF THE 1990 ACTUARIAL VALUATION

Actuarial Balance Sheet

Table I, which follows, is the actuarial balance sheet of the County Employees Retirement System as of June 30, 1990. The "actuarial balance sheet" of the retirement system displays the fundamental relationship between actual assets, future contributions, and future benefits. The asset side of the balance sheet is comprised of actual fund assets plus the actuarial present value of future contributions on behalf of current members. The actuarial present values of all projected benefit payments to present active and inactive members make up the balance sheet liabilities.

Determination of Contribution Rate

The rate of contribution by the participating Agencies required to provide 30 year amortization of the Unfunded Actuarial Accrued Liability under the level-percentage-of-payroll method, the employer share of the annual Normal Cost, medical insurance and the administrative costs of the System is shown in Table II. The required contribution is expressed both in dollars and as a percentage of the estimated payroll of the participating Agencies as of June 30, 1990.

The actuarial methods applied to determine the Normal Cost for the year commencing July 1, 1990 are described on page C-2. These costs are classified by type of benefit. The Normal Cost contribution rate of the participating Agencies is determined by reducing the total Normal Cost by the expected employee contributions. A breakdown of costs between Hazardous and Non-Hazardous position employees appears in Table III.

Accountant's Information

Table IV contains a calculation of the accumulated value of plan benefits as specified under FASB Statement No. 35. Under this calculation, the present value of future benefits payable and attributable to the employee's present accrued benefit is computed. The probabilities of termination, disability, mortality and retirement are the same for this calculation as those used in the regular valuation calculations. However, future increases in earnings and additional benefit accruals are not projected beyond the current valuation date.

Table V contains information needed to comply under GASB Statement No. 5. These calculations reflect the present value of benefits attributable to current years of service, but based on projected salary levels at the time a member's final benefits are determined.

Table VI contains information needed to comply under GASB Statement No. 12. These calculations reflect the liabilities for the medical premium benefit provided under the system.

TABLE I
COUNTY EMPLOYEES RETIREMENT SYSTEM
ACTUARIAL BALANCE SHEET-JUNE 30, 1990

ACTUARIAL ASSETS

| | |
|----------------------------------------------------------|--------------------|
| Fund Assets at Book Value* | \$1,274,063,862 |
| Actuarial Present Value of Future Member Contributions | 504,155,580 |
| Actuarial Present Value of Future Employer Contributions | |
| For Normal Costs | \$ 552,040,092 |
| For Unfunded Actuarial Accrued Liability | <u>162,257,399</u> |
| Total | \$ 714,297,491 |
| Total Actuarial Assets | \$2,492,516,933 |

ACTUARIAL LIABILITIES

| | |
|--------------------------------------------|---------------------|
| Actuarial Present Value of Future Benefits | |
| Inactive Members: | |
| Retired Members and Beneficiaries | \$ 414,437,109 |
| Vested Retirement | 16,002,986 |
| Vested Membership | <u>5,502,190</u> |
| Total - Inactive | \$ 435,942,285 |
| Active Members: | |
| Retirement Benefits | \$1,736,704,143 |
| Disability Benefits | 96,927,050 |
| Withdrawal Benefits (Vested and | |
| Refund of Contributions) | 124,176,511 |
| Survivor Benefits | <u>94,769,349</u> |
| Total - Active | \$2,052,577,053 |
| Refunds and Expenses Payable | <u>\$ 3,997,595</u> |
| Total Actuarial Liabilities | \$2,492,516,933 |

ACCRUED BENEFIT LIABILITY **

| | |
|---------------------|----------------|
| Vested Benefits | \$ 802,567,660 |
| Non-Vested Benefits | \$ 104,920,584 |

- * The approximate market value of assets as of June 30, 1990 is \$1,319,415,509 (\$1,034,156,098 for Non-Hazardous and \$285,259,411 for Hazardous).
The actuarial value of assets as of June 30, 1990 is \$1,270,066,267 (book value of assets less refunds and expenses payable).
The Members' Contribution Account as of June 30, 1990 is \$254,282,752.
- ** Present value of accrued benefit deferred to normal retirement date.

TABLE II
COUNTY EMPLOYEES RETIREMENT SYSTEM
DETERMINATION OF CONTRIBUTION RATE-JUNE 30, 1990

| <u>UNFUNDED ACTUARIAL ACCRUED LIABILITY</u> | | <u>PERCENT*</u> |
|----------------------------------------------------------------|----------------------|-----------------|

SECTION VII

COMMENTS AND CERTIFICATION

Comments

The total Actuarial Accrued Liability has increased from \$1,113,868,548 on June 30, 1989 to \$1,432,323,666 on June 30, 1990. The Unfunded Actuarial Accrued Liability increased from \$35,815,913 to \$162,257,399. Total actuarial value of assets as of June 30, 1990 was equal to \$1,270,066,267.

The Unfunded Actuarial Accrued Liability increased from 4.92% to 20.53% as a percentage of annual payroll and from 3.2% to 11.3% as a percentage of the Actuarial Accrued Liability in the year ended June 30, 1990.

The change in contribution rate between the 1989 and 1990 valuations is a function of actual plan experience. A formal gain and loss analysis would identify the portion of the contribution rate change attributable to each element of plan experience and benefit change. However, undertaking such an analysis would be extremely time consuming and expensive. In lieu of the formal analysis, we have estimated the impact of the various components of gain and loss based on changes in statistical averages of each group. Because of the significant impact of new entrants this year, especially in the Hazardous system, this analysis should be viewed as a very rough estimate. The following table shows the results of this computation:

| | <u>Non-Hazardous Position Employees</u> | <u>Hazardous Position Employees</u> |
|-------------------------------------------------------------------------------------------------------------------|---------------------------------------------|-----------------------------------------|
| June 30, 1989 Contribution Rate | 5.94% | 19.39% |
| Expected Change in Unfunded Actuarial Accrued Liability Payment Due to Increasing Covered Payroll | 0.03% | (0.64%) |
| Change Due to Revision in Actuarial Assumptions | 0.76% | (0.44%) |
| Change Due to Adoption of Level- Percentage-of-Payroll Method of Amortizing Unfunded Actuarial Liability | (0.04%) | (2.68%) |
| Increase Expected Due to Legislated Benefit Improvements | | |
| • Increase in Benefit Rate | 1.39% | - |
| • "27 and Out" Benefit | 0.37% | - |
| • Retiree COLA | 0.27% | 0.43% |
| • Change in Employee Contribution Rate | (0.60%) | - |
| Investment Return | (0.23%) | (0.58%) |
| Salary Increases | (0.09%) | 0.33% |
| Decrements Experience* | (0.06%) | 0.29% |

| | | |
|---------------------------------------------------|-------|--------|
| Change in Group Hospital and Medical Premium Rate | 0.17% | 0.46% |
| Change in Administrative Expense Rate | 0.29% | 0.23% |
| June 30, 1990 Contribution Rate | 8.20% | 16.79% |

*Includes mortality, disability, termination of employment and retirement experience.

The annual contribution rate required by the participating Agencies to provide the Normal Cost, 30 year amortization of the Unfunded Actuarial Accrued Liability under the level-percentage-of-payroll method, and pay administrative expenses for Non-Hazardous position employees is 6.82%. An additional 1.38% is required to fund medical insurance for retirees, bringing the total required contribution to 8.20%. This exceeds the current 7.68% budgeted contribution rate. The contribution rate was increased substantially for the 1990-91 year as a result of benefit improvements. Another substantial increase on top of that would be necessary to raise the rate to the level developed in this valuation. In lieu of that, it is reasonable to transition to the higher level over the next two years, since there should be no further benefit or assumptions changes to reflect until the June 30, 1992 valuation at the earliest. Accordingly, we have reflected approximately 50% of the increase in our recommended contribution rate in this valuation, with the anticipation that the remaining portion of the increase will be reflected in our June 30, 1991 valuation recommendation. This allows participating agencies to more effectively budget for the increase. Therefore, it is our opinion that the contribution rate beginning July 1, 1991 be increased from the current 7.68% level to 7.95%, and we so recommend.

The annual contribution rate required by the participating Agencies to provide the Normal Cost, 30 year amortization of the Unfunded Actuarial Accrued Liability under the level-percentage-of-payroll method, and pay administrative expenses for Hazardous position employees is 11.68%. An additional 5.11% is required to fund medical insurance for retirees, bringing the total required contribution to 16.79%. This exceeds the current 15.43% budgeted contribution rate. Last year, because of the substantial influx of new plan participants into this system, we recommended transitional adjustments in the contribution rate to allow the system time to absorb all the new entrants, and the contribution rate to settle at the ultimate level. This recommendation is still appropriate in this valuation. In addition, it is reasonable to transition to the higher level over the next two years, since there should be no further benefit or assumptions changes to reflect until the June 30, 1992 valuation at the earliest. Accordingly, we have reflected approximately 50% of the increase in our recommended contribution rate in this valuation, with the anticipation that the remaining portion of the increase will be reflected in our June 30, 1991 valuation recommendation. This allows participating agencies to more effectively budget for the increase. Therefore, it is our opinion that the contribution rate beginning July 1, 1991 be increased from the current 15.43% level to 16.10%, and we so recommend.

The recommended contribution rates are based on current statutory benefits. The budgeted contribution rates will again be reviewed in the June 30, 1991 valuation.

The following table shows the total Actuarial Accrued Liability, the Unfunded Actuarial Accrued Liability, percent unfunded and the growth of the invested assets at selected intervals since the inception of the System.

COUNTY EMPLOYEES RETIREMENT SYSTEM

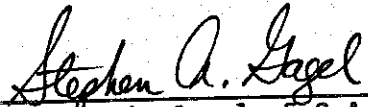

| July 1 of Year Shown | Total Actuarial Accrued Liability | Unfunded Actuarial Accrued Liability | Percent Unfunded | Actuarial Value Of Assets | Increase in Assets |

*Includes capitalized appreciation of investments.

Certification

On the basis of the actuarial assumptions given and the data furnished by the General Manager of the County Employees Retirement System, it is certified that the actuarial valuation has been made by the use of accepted actuarial principles and that adequate provision is being made for the funding of future benefits.

Date

SECTION VI

SUMMARY OF PRINCIPAL PLAN PROVISIONS

Effective Date

The state of Kentucky established the County Employees Retirement System in July, 1958. The plan benefits have been improved several times, most recently as of August 1, 1990.

Plan Year

A plan year is a twelve month period beginning on July 1.

Final Compensation

Final compensation is the average salary during the five highest paid fiscal years. If the months of service credit during the highest five year period is less than forty-eight, one or more additional fiscal years shall be used.

Service

Service means the sum of prior service and current service as defined below:

- (a) Prior service is credited for regular full-time employment of at least 100 hours of work per month with a participating agency before July 1, 1958. In some instances prior service credit is granted for time spent in the military.
- (b) Current service is obtained for regular full-time employment which averages at least 100 hours of work per month with participating agencies after July 1, 1958. Current service credit may be granted for military service and educational leaves if special criteria are met.
- (c) Employers may elect to purchase up to 6 months additional service credit based on an employee's unused sick leave.

Eligibility

Any county or political subdivision or instrumentality, including school boards or urban county government may participate in the System upon approval by the Board. Membership in the system consists of:

- (a) all persons who become employees of a county after such county first participates,
- (b) all persons who are employees on the date a county first participates and who elect within thirty days to become members and make contributions.

Membership does not include employees of a county who are members of some other state, county, or local retirement system, supported in whole or in part by public funds.

Normal Retirement Date

A member may elect to retire upon: (1) attaining age 65 for non-hazardous positions, or attaining age 55 for hazardous positions, and (2) having contributed to the System. Upon completion of 27 years of service credit, 15 of which are current service for non-hazardous positions, or completion of 20 years of service credit for hazardous positions, a member may elect to retire with an unreduced benefit.

Early Retirement Date

A member may elect to retire before the normal retirement date at any time after: (1) for non-hazardous positions, attainment of age 55 and completion of 60 months of service credit at least 12 of which are current, or at any age after 25 years of service, or (2) for hazardous positions, attainment of age 50 and completion of 15 years of service credit.

Normal Retirement Benefits

For non-hazardous positions, upon attainment of age 65 and completion of 48 months of service, of which 12 months are current service, a monthly benefit equal to 2.20% of the member's final compensation multiplied by his service will be payable. For hazardous positions, a monthly benefit equal to 2.50% of the member's final compensation multiplied by his service will be payable upon attainment of age 55 and completion of 60 months of service of which 12 months are current service. A member, with less than 48 months for non-hazardous positions or 60 months for hazardous positions, who retires on or after the normal retirement date is entitled to a retirement allowance which pays the actuarial equivalent of twice the member's accumulated contributions for life.

Early Retirement Benefits

A member who elects early retirement is entitled to a monthly benefit reduced for each month by which the early retirement date precedes the first date on which the member would qualify for an unreduced benefit. If a non-hazardous position employee has 27 or more years of service credit, 15 of which are current, or a hazardous position employee has 20 or more years of service credit, an unreduced benefit is payable.

Disability Benefits

A member with 60 months of service, 12 of which must be current service, is entitled to a retirement allowance computed in the same manner as the normal retirement benefit with service and final compensation determined as of the disability date. Service credit shall be added on to total service for the period from the last day of paid employment to the 65th birthday (55th for members in a hazardous position) up to a maximum of service credited to the last day of paid employment. Except for members with 25 or more (20 or more for hazardous) years of service on the last day of paid employment, the maximum combined service credit (total service and added service) shall not exceed 25 years (20 years for hazardous members). For non-hazardous position employees with 25 or more years of service, additional years of service credit will be added up to maximum combined limit of 30, or actual service if greater. For hazardous position employees with 20 or more years of service credit, actual service will be used.

A member in a hazardous position who is disabled in the line of duty is entitled to a retirement benefit of not less than 25% of the member's final monthly rate of pay plus 10% of his final monthly rate of pay for each dependent child. The maximum dependent child's benefit is 40% of the member's final monthly rate of pay. A partial disability benefit may be payable to hazardous employees if the disability is not total and permanent. The disability will be reduced to a rate determined by the Board.

Death Benefits

If a member dies prior to retirement, but after 60 months of service, 12 of which are current and who is a contributing member, or after 12 years of service, one of which is current and who is not a contributing member, or after 48 months service if the member is age 65 or over, a benefit will be payable to the beneficiary based on the member's age, years of service and final compensation at the date of death. The benefit will be equal to the amount payable had the employee retired and elected a joint and 100% survivorship payment form.

If a member in a hazardous position dies in the line of duty and has a spouse as beneficiary, a \$5,000 lump sum payment will be made and a benefit of 25% of the member's final monthly rate of pay will be payable until death or remarriage. If the member in a hazardous position dies in the line of duty and has a dependent as beneficiary, a lump sum payment of \$10,000 will be made. Monthly payments shall be made for each dependent child equal to 10% of the member's final monthly rate of pay, but not greater than 40% of the member's final monthly rate of pay. The beneficiary of a hazardous duty member with 5 or more years of service, one of which is current, may elect a death benefit computed in the same manner as a non-hazardous employee using 2.50% rather than 2.20%.

Upon the death of a retired member, who had a minimum of 48 months of service credit, a death benefit of \$2,500 is payable.

Optional Forms of Payment

Joint and survivor annuities which provide a reduced benefit for the life of the member, with the benefit at the same or at a further reduced rate continuing after the member's death until the death of the designated beneficiary may be elected by the member prior to retirement. Other optional forms include a life annuity with 10, 15 or 20 years of payments guaranteed and a Social Security adjustment with or without survivor rights.

Contributions

Members contribute 5% of gross compensation (7% for hazardous positions). On each June 30, interest is credited at the rate to be determined by the Board on the accumulated contributions the member had in his account on the previous June 30. Upon termination a member may withdraw the contributions with interest, but will be entitled to no benefit payments.

Medical Insurance

Recipients of a retirement benefit may elect to participate in a voluntary hospital/medical group insurance plan for themselves as well as any beneficiaries or dependents. The cost of participation for any beneficiaries or dependents is borne by the retiree (except that dependents of hazardous position employees and legislators will have the same percentage paid by the system as the member). The retirement system will pay a portion of the cost of participation for the retiree based on years of service credit as follows:

| | |
|-------------------|------|
| Less than 4 years | 0% |
| 4 - 9 years | 25% |
| 10 - 14 years | 50% |
| 15 - 19 years | 75% |
| 20 or more years | 100% |

If a hazardous member is disabled in the line of duty, the retirement system will pay 100% of the cost of the member, spouse and eligible dependents. If a hazardous member is killed in the line of duty, the retirement system will pay 100% of the cost of the beneficiary and eligible dependents as long as they remain eligible for a monthly benefit payment.

THIRTY-SECOND ANNUAL ACTUARIAL VALUATION

JUNE 30, 1990

STATE POLICE RETIREMENT SYSTEM

FRANKFORT, KENTUCKY

SECTION I

INTRODUCTION

The results of the thirty-second annual actuarial valuation of the State Police Retirement System are presented in this report. The actuarial valuation was made on the basis of the data provided by the System as of June 30, 1990.

The purpose of the actuarial valuation is to determine the actuarial condition of the Retirement System and the rate of employer contribution for the ensuing fiscal year as required to support the System.

The plan provisions utilized in this valuation are described in the Summary of Principal Plan Provisions beginning on page S-29. The basis of funding is defined in KRS 61.565 and provides that the actuarial valuation method would be uniform for all benefits provided by the System. The Entry Age Normal Actuarial cost method has been used for all benefits. KRS 61.565 provides that each employer participating in the System shall contribute an amount equal to the Normal Cost contribution rate, and an amount sufficient to amortize the Unfunded Actuarial Accrued Liability over 30 years using the level-percentage-of-payroll method. This is the standard used herein to determine whether the funding of the System is adequate.

The actuarial valuation results are based upon the employee census and asset data supplied by the office of the System, and upon the actuarial assumptions as stated on page S-4.

the first of these is the fact that the

SECTION II

ACTUARIAL CONSIDERATIONS

Description of Actuarial Methods

The actuarial valuation is the means by which the contingent liabilities and contribution rates of a retirement system are evaluated and determined. It provides a guide to the System as to the financing required during years of active service to accumulate the funds needed to provide members' benefits. It also makes it possible to estimate beforehand the cost of proposed changes in the System so that action can be taken in the light of the cost consequences.

The methods of valuation are prescribed by KRS 61.565. The Entry Age Normal Actuarial cost method was used to determine costs of all benefits with the exception of the retiree medical insurance benefit. Under this method the employer's contribution to the retirement system consists of Normal Cost, a payment to fund the Unfunded Actuarial Accrued Liability, medical insurance, and administrative expenses. The Normal Cost represents the contribution (as a level percent of payroll) that completely funds benefits at retirement if made from a person's entry into employment until his retirement. The Actuarial Accrued Liability represents the sum of money and investments that would be held in the fund if the retirement system had been in effect since the date each member was first employed.

The medical insurance contribution rate was originally determined in the 1987 valuation as the level percent of payroll necessary to fund projected medical insurance premiums over the next sixteen years (taking into account the level of reserves in the Insurance Fund). Beginning in 1988, this rate is being increased each year by a percentage amount which will result in reaching the Entry Age Normal funding rate within a 20 year period measured from 1987.

The amount of the administrative expense was based on the budgeted amount for the twelve months following the date of the valuation.

Actuarial Assumptions

Since the actuarial valuation involves estimates of benefits payable in the future, it is necessary that assumptions be made as to the interest earnings, rates of mortality, withdrawal, retirement, and disability, and the rate at which salaries will increase. In addition, an assumption must be made relative to increases in medical insurance premium rates in order to value the liability for the medical insurance benefit. It is desirable that the actuarial assumptions be reviewed periodically to see whether past experience and probable future experience justifies the continued use of these actuarial assumptions. Such a study was performed subsequent to the 1989 actuarial valuation and new actuarial assumptions were adopted by the Board for use in the subsequent actuarial valuations, until such time as another experience study is performed. This valuation reflects assumptions based on the 1989 experience study.

Actuarial Value of Assets

The actuarial value of assets is determined as the book value of the assets as of the valuation date, plus accrued investment income and member and employer contributions receivable, less member refunds and investment expenses payable. Except for Table V, the actuarial value of assets excludes any amounts in the Insurance Fund. Table V uses only assets in the Insurance Fund, excluding all other amounts.

STATE POLICE RETIREMENT SYSTEM

ACTUARIAL ASSUMPTIONS

A. STATEMENT OF ACTUARIAL ASSUMPTIONS

- (1) Mortality:
 - (a) Active & retired lives - 1983 Group Annuity Mortality Table, plus a pre-retirement duty death rate of .0005 per year.
 - (b) Disabled lives - Social Security Administration Disability Mortality Rates - Actuarial Study No. 75 (current rates used by PBGC for disabled lives receiving Social Security).
- (2) Disablement - Graduated rates based on 1989 experience study.
- (3) Termination of employment - Graduated rates based on 1989 experience study.
- (4) Retirement - 50% will retire as soon as eligible for unreduced benefits and balance will continue to age 55.
- (5) Marital status
 - (a) Percentage married - 100%.
 - (b) Age difference - Males are assumed to be 3 years older than their spouses.
- (6) Dependent children - For duty related death benefits, it is assumed that the employee is survived by 2 dependent children, each age 6.
- (7) Investment return - 8.00% per year, net of investment related expenses, compounded annually.
- (8) Compensation progression - 6.50% per year, compounded annually.

(9) Retiree Medical Insurance

- It was assumed that future retirees would select medical coverage in the same proportion that current retirees have selected coverage. Monthly premium rates were assumed to be as follows:

| Plan Type | 7/1/90 Rate | Rate Increase | |
|-------------|----------------|---------------|-----------|
| | | Date | Rate |
| Single | \$102.96* | 11/1/90 | \$124.27* |
| Family | 241.66* | 11/1/90 | 261.97* |
| Medicare | 56.35* | 1/1/91 | 61.99** |
| High Option | 84.40* | 1/1/91 | 92.84** |

*Actual rates

**Assumed rates

In determining the medical premium funding rate in 1987, medical premiums were assumed to increase at an annual rate of 12%. In determining the target Entry Age Funding rate in valuations subsequent to 1987, it was assumed that medical premiums would grow at an annual rate of 10%. The assumed rate of growth in number of retirees receiving medical insurance was based on assumed retirement and mortality patterns used throughout the valuation.

Reserves in the Insurance Fund were used to offset the liability for premiums.

(10) Missing data

- For those active members with incomplete data, the following assumptions were made:

- . If reported salary was zero or blank, then monthly salary was assumed to be \$1,505
- . If reported age was blank, then assume current age equal to age 18 plus years of service reported

B.

SAMPLE RATES

(1) Annual Rates of Mortality:

| <u>Age</u> | <u>Active Mortality*</u> | | <u>Disabled Mortality</u> | |
|------------|--------------------------|----------------|---------------------------|----------------|
| | <u>Males</u> | <u>Females</u> | <u>Males</u> | <u>Females</u> |
| 25 | 0.05% | 0.03% | 4.83% | 2.63% |
| 30 | 0.06 | 0.03 | 3.62 | 2.37 |
| 40 | 0.12 | 0.07 | 2.82 | 2.09 |
| 50 | 0.40 | 0.16 | 3.83 | 2.57 |
| 55 | 0.61 | 0.25 | 4.82 | 2.95 |
| 60 | 0.92 | 0.42 | 6.03 | 3.31 |

*Plus 0.05% duty death rate prior to retirement.

(2) Annual Rates of Decrement:

| <u>Age</u> | <u>Disablement</u> | <u>Ultimate Termination</u> |
|------------|--------------------|-----------------------------|
| 25 | 0.03% | 3.04% |
| 30 | 0.03 | 3.38 |
| 40 | 0.09 | 1.50 |
| 50 | 0.35 | 0.00 |
| 55 | 0.66 | 0.00 |
| 60 | 1.16 | 0.00 |

(3) Compensation Progression:

| <u>Age</u> | <u>Rate of Annual Increase</u> | <u>Compensation at Normal Retirement as Percentage Of Current Annual Compensation</u> |
|------------|--------------------------------|---------------------------------------------------------------------------------------|
| 25 | 6.50% | 661.4% |
| 30 | 6.50 | 482.8 |
| 40 | 6.50 | 257.2 |
| 50 | 6.50 | 137.0 |

SECTION III

STATE POLICE RETIREMENT SYSTEM

RESULTS OF THE 1990 ACTUARIAL VALUATION

Actuarial Balance Sheet

Table I, which follows, is the actuarial balance sheet of the State Police Retirement System as of June 30, 1990. The "actuarial balance sheet" of the retirement system displays the fundamental relationship between actual assets, future contributions, and future benefits. The asset side of the balance sheet is comprised of actual fund assets plus the actuarial present value of future contributions on behalf of current members. The actuarial present values of all projected benefit payments to present active and inactive members make up the balance sheet liabilities.

Determination of Contribution Rate

The rate of contribution by the State required to provide 30 year amortization of the Unfunded Actuarial Accrued Liability under the level-percentage-of-payroll method, the employer share of the Normal Cost, medical insurance and the administrative costs of the System is shown in Table II. The required contribution is expressed both in dollars and as a percentage of the estimated annual covered payroll as of June 30, 1990.

The actuarial methods applied to determine the Normal Cost for the year commencing July 1, 1990 are described on page S-2. These costs are classified by type of benefit. The Normal Cost contribution rate of the State is determined by reducing the total Normal Cost by the expected employee contributions.

Accountant's Information

Table III contains a calculation of the accumulated value of plan benefits as specified under FASB Statement No. 35. Under this calculation, the present value of future benefits payable and attributable to the employee's present accrued benefit is computed. The probabilities of termination, disability, mortality and retirement are the same for this calculation as those used in the regular valuation calculations. However, future increases in earnings and additional benefit accruals are not projected beyond the current valuation date.

Table IV contains information needed to comply under GASB Statement No. 5. These calculations reflect the present value of benefits attributable to current years of service, but based on projected salary levels at the time a member's final benefits are determined.

Table V contains information needed to comply under GASB Statement No. 12. These calculations reflect the liabilities for the medical premium benefit provided under the system.

SECTION IV

COMMENTS AND CERTIFICATION

Comments

The total Actuarial Accrued Liability increased from \$134,550,773 on June 30, 1989 to \$154,007,622 on June 30, 1990. The Unfunded Actuarial Accrued Liability has increased from \$3,200,220 to \$8,982,071. Total actuarial value of assets as of June 30, 1990 was equal to \$145,025,551.

The Unfunded Actuarial Accrued Liability increased from 13.18% to 34.59% as a percentage of annual payroll and increased 2.4% to 5.8% as a percentage of the Actuarial Accrued Liability in the year ended June 30, 1990.

The change in contribution rate between the 1989 and 1990 valuations is a function of actual plan experience. A formal gain and loss analysis would identify the portion of the contribution rate change attributable to each element of plan experience and benefit change. However, undertaking such an analysis would be extremely time consuming and expensive. In lieu of the formal analysis, we have estimated the impact of the various components of gain and loss based on changes in statistical averages of each group. The following table shows the results of this computation:

| | |
|----------------------------------------------------------------------------------------------------------------|---------|
| June 30, 1989 Contribution Rate | 18.83% |
| Expected Change in Unfunded Actuarial Accrued Liability Payment Due to Increasing Covered Payroll | (0.08%) |
| Change Due to Revision in Actuarial Assumptions | 0.06% |
| Change Due to Adoption of Level-Percentage- of-Payroll Method of Amortizing Unfunded Actuarial Liability | (1.01%) |
| Increase Expected Due to Legislated Improvements | |
| • Increase in Benefit Rate | 1.04% |
| • Retiree COLA | 1.39% |
| Investment Return | (1.26%) |
| Salary Increases | (0.82%) |
| Other Decrements* | 0.73% |
| Change in Group Hospital and Medical Premium Rate | 0.56% |
| Change in Administrative Expense Rate | 0.13% |
| June 30, 1990 Contribution Rate | 19.57% |

*Includes mortality, disability, termination of employment and retirement experience.

The annual State contribution rate required to provide the Normal Cost, 30 year amortization of the Unfunded Actuarial Accrued Liability under the level-percentage-of-payroll method, and pay administrative expenses is 10.09%. An additional 9.48% is required to fund medical insurance for retirees, bringing the total required contribution to 19.57%. This is less than the current 20.31% budgeted contribution rate. As a result of House Bill 799, the General Assembly appropriated \$3,656,700 in funds to be made as an additional contribution to the KERS Non-Hazardous, KERS Hazardous and State Police Retirement Systems. This amount makes up for the budgeted reduction in State funding (plus interest) during the 1988-90 biennium. This additional contribution is to be used to eliminate, if possible, or otherwise reduce the amount of any recommended increase in the contribution rate. The portion of the additional contribution attributable to The State Police Retirement System is \$112,992. This amount was received by the retirement system on July 2, 1990. Since the rate developed in this valuation is less than the current budgeted rate, none of these funds are needed to prevent a rate increase. The entire amount can be carried over as a gain to offset anticipated salary experience losses in the June 30, 1991 valuation. Therefore, it is our opinion that the contribution rate beginning July 1, 1991 should be decreased from the current 20.31% level to 19.57%, and we so recommend.

The recommended contribution rates are based on current statutory benefits. The budgeted contribution rates will again be reviewed in the June 30, 1991 valuation.

The following table shows the total Actuarial Accrued Liability, the Unfunded Actuarial Accrued Liability, percent unfunded and the growth of the invested assets at selected intervals since the inception of the System.

SECTION VI

SUMMARY OF PRINCIPAL PLAN PROVISIONS

Effective Date

The state of Kentucky established the State Police Retirement System in July, 1958. The plan benefits have been improved several times, most recently as of August 1, 1990.

Plan Year

A plan year is a twelve month period beginning on July 1.

Final Compensation

Final compensation is the average salary during the five highest paid fiscal years. If the months of service credit during the highest five year period is less than forty-eight, one or more additional fiscal years shall be used.

Service

Service means the sum of prior service and current service as defined below:

- (a) Prior service is credited for regular full-time employment of at least 100 hours of work per month with a participating agency before July 1, 1958. In some instances prior service credit is granted for time spent in the military.
- (b) Current service is obtained for regular full-time employment which averages at least 100 hours of work per month with participating agencies after July 1, 1958. Current service credit may be granted for military service and educational leaves if special criteria are met.
- (c) Service is increased by unused sick leave, up to a maximum of six months, for purposes of computing eligibility and the amount of benefits.

Eligibility

The Bureau of State Police shall participate in the System. Membership in the system consists of:

- (a) all regular full-time officers of the Kentucky State Police who are entitled to exercise the powers of police officers,
- (b) no person who is age 31 or over shall be eligible to become an employee of the Kentucky State Police.

Normal Retirement Date

A member may elect to retire upon attaining age 55 and having contributed to the System. Upon completion of 20 years of service credit, 15 of which are current service, a member may declare the normal retirement date to be some date prior to age 55.

Early Retirement Date

A member may elect to retire before the normal retirement date at any time after attainment of age 50 and completion of 15 years of service credit.

Normal Retirement Benefits

A monthly benefit equal to 2.50% of the member's final compensation multiplied by his service will be payable upon attainment of age 55 and completion of 60 months of service of which 12 months are current service. A member who retires on or after the normal retirement date with less than 60 months of service is entitled to a retirement allowance which pays the actuarial equivalent of twice the member's accumulated contributions for life.

Early Retirement Benefits

A member who elects early retirement is entitled to a monthly benefit reduced for each month by which the early retirement date precedes the first date on which the member would qualify for an unreduced benefit. If a member has 20 or more years of service credit (15 of which are current), an unreduced benefit is payable.

Disability Benefits

A member with 60 months of service, 12 of which must be current service, is entitled to a retirement allowance computed in the same manner as the normal retirement benefit with service and final compensation determined as of the disability date. Service credit shall be added on to total service for the period from the last day of paid employment to the 55th birthday up to a maximum of service credited to the last day of paid employment. Except for members with 20 or more years of service on the last day of paid employment, the maximum combined service credit (total service and added service) shall not exceed 20 years. For members with 20 or more years of service credit, actual service will be used. The retirement benefit shall not be less than 25% of the member's final monthly rate of pay for those disabled in the line of duty. Ten percent of final monthly rate of pay for each dependent child is also payable if disability occurs in line of duty. The maximum dependent child's benefit is 40% of the member's final monthly rate of pay. A partial disability benefit may be payable if the disability is not total and permanent. The disability will be reduced to a rate determined by the Board.

Death Benefits

If a member dies prior to retirement, but after 60 months of service, 12 of which are current and who is a contributing member, or after 12 years of service, one of which is current and who is not a contributing member, a benefit will be payable to the beneficiary based on the member's age, years of service and final compensation at the date of death. The benefit will be equal to the amount payable had the employee retired and elected a joint and 100% survivorship payment form.

If a member dies in the line of duty and has a spouse as beneficiary, a \$5,000 lump sum payment will be made and a benefit of 25% of the member's final monthly rate of pay will be payable until death or remarriage. If the member dies in the line of duty and has a dependent as beneficiary, a lump sum payment of \$10,000 will be made. Monthly payments shall be made for each dependent child equal to 10% of the member's final monthly rate of pay, but not greater than 40% of the member's final monthly rate of pay. The beneficiary of a member with 5 or more years of service, one of which is current, may elect a death benefit computed in the same manner as a non-hazardous employee under KERS and CERS, using 2.50% rather than the non-hazardous benefit rate.

Upon the death of a retired member, who had a minimum of 48 months of service credit, a death benefit of \$2,500 is payable.

Optional Forms of Payment

Joint and survivor annuities which provide a reduced benefit for the life of the member, with the benefit at the same or at a further reduced rate continuing after the member's death until the death of the designated beneficiary may be elected by the member prior to retirement. Other optional forms include an annuity with 10, 15 or 20 years of payments guaranteed and a Social Security adjustment with or without survivor rights.

Contributions

Members contribute 7% of gross compensation until age 55. On each June 30, interest is credited at the rate to be determined by the Board on the accumulated contributions the member had in his account on the previous June 30. Upon termination a member may withdraw the contributions with interest, but will be entitled to no benefit payments.

Medical Insurance

Recipients of a retirement benefit may elect to participate in a voluntary hospital/medical group insurance plan for themselves as well as any beneficiaries or dependents. The retirement system will pay a portion of the cost of participation for the retiree and dependents based on years of service credit as follows:

| | |
|-------------------|------|
| Less than 4 years | 0% |
| 4 - 9 years | 25% |
| 10 - 14 years | 50% |
| 15 - 19 years | 75% |
| 20 or more years | 100% |

If a member is disabled in the line of duty, the retirement system will pay 100% of the cost of the member, spouse and eligible dependents. If a member is killed in the line of duty, the retirement system will pay 100% of the cost of the beneficiary and eligible dependents as long as they remain eligible for a monthly benefit payment.

INVESTMENT SECTION

1870

1871

INTRODUCTION TO INVESTMENT SECTION

The Kentucky Retirement Systems—Kentucky Employees Retirement System, County Employees Retirement System and State Police Retirement System—were created to provide present and future retirement benefits for the members. Charged with the responsibility of investing the assets to attain this goal, the members of the Board of Trustees follow a policy of preserving capital, while always seeking means of enhancing revenues and protecting against losses in any particular investment area.

The Board continues to invest in such a way that benefits can be paid from the income of those investments and not from contributions or by liquidating the assets themselves. This ensures that the unfunded liabilities will continue to decrease over time and adequate monies should be available for improving benefits without substantial increases in the contribution rates of its members and participating employers.

To accomplish this goal, the Board contracts for the services of professional and experienced investment advisors.

In addition to these contracted advisors, the Investment Staff of the Retirement Systems, manages an Index Equity fund of selected common stocks. The aim of this fund is to perform as well as or better than the Standard & Poor 500 Stock Index.

As a result of an asset allocation review, the Board has begun presenting investment information by specific groups within the three retirement systems. Thus, you will see the hazardous groups of the county and state systems presented separately. Because these groups have their own actuarial experience and, therefore, specific financial needs, the Board has invested the assets of those groups into the types of investments most suited to meet those needs.

Frankfort, Kentucky 40601

Members of the Board:

The Fiscal Year ended June 30, 1990 was noteworthy for the invested assets of the Kentucky Retirement Systems in a number of regards. The total assets of the Systems grew significantly to \$3.5 Billion from \$3.1 Billion at the beginning of the Fiscal Year.

During the Fiscal Year, the capital markets afforded a positive environment for financial assets. In this environment, the Systems' assets produced a rate of return of 11.6%. Negative returns were suffered in only two of twelve months, as both the stock and bond markets generally proceeded on an upward track. While this return is strong in an absolute sense, it was undoubtedly impacted adversely by changes in the investment structure which were being undertaken during the course of the Fiscal Year.

As a comparison to the above, the stock market, as measured by the Standard & Poor's 500 average, returned 16.4% while the bond market, as represented by the Shearson Lehman Government/Corporate Bond Index, grew by 7.1%. In evaluating these comparisons, it should be noted that cash was deliberately raised to facilitate the changes in the Systems' manager structure which were put into place beginning on April 1.

The Systems' asset allocation structure and managers were significantly altered by a series of decisions during the course of the Fiscal Year. Based upon a study which projected the future liabilities of the Systems and recognized the goals and objectives of the Board, Mercer recommended an asset allocation structure which optimized the probability that future investment returns would be sufficient to meet those goals. The recommendation, which is shown below by asset class and manager role, was accepted by the Board:

| | <u>% of Asset Class</u> | <u>% of Portfolio</u> |
|---------------------------------------------|-----------------------------|---------------------------|
| • Equities - 55% of Total Assets | | |
| - S&P 500 Index Fund | 50% | 27.50 |

In order to implement the asset allocation recommendation, a number of manager searches were conducted to identify appropriate managers for each role. The process began by identifying a large list of candidates and sending each a Request for Proposal. Other candidates were welcome to submit a Proposal as well. The Proposals were analyzed and the candidate list narrowed to a shorter list which was more thoroughly analyzed. Based on this analysis, interviews with the Investment Committee of the Board were held with a small number of finalists for each role. After the interviews, fee negotiations were conducted with the top two or three candidates for each role. The process resulted in the selection of the following managers for each of the roles:

- Equities
 - S&P 500 Index Fund - Internally managed
 - Large Capitalization Value Equities - Investment Counselors of Maryland
 - Large Capitalization Growth Equities - Investment Advisers, Inc.
 - Small Capitalization Value Equities - Investment Counselors of Maryland

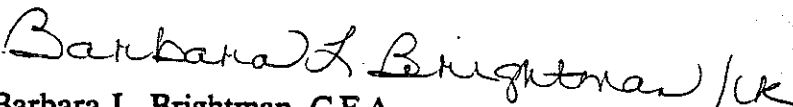

Board of Trustees
November 16, 1990
Page 4

- **Fixed Income**
 - Shearson Lehman Aggregate Index Fund - T. Rowe Price Associates
 - Actively Managed Fixed Income - National Asset Management
 - Actively Managed Short Term - T. Rowe Price Associates
- **Real Estate**
 - Core Real Estate - Heitman Financial Services (in addition to the existing portfolio), The Yarmouth Group, Trust Company of the West Realty Advisors.

The Board allocated the assets to the managers, in cash and in kind, on April 1, 1990. The portfolios were largely structured in accordance with the managers' styles by the end of the Fiscal Year. Although the period under management for the new structure is insufficient and immaterial for analysis, we are confident that the structure will meet the Systems' needs in the long term.

Respectfully submitted,

WILLIAM M. MERCER ASSET PLANNING, INCORPORATED

Barbara L. Brightman, C.F.A.
Principal

1890
The first of the year
was a very dry one
and the crops were
very poor.

The second of the year
was a very wet one
and the crops were
very good.

The third of the year
was a very dry one
and the crops were
very poor.

The fourth of the year
was a very wet one
and the crops were
very good.

The fifth of the year
was a very dry one
and the crops were
very poor.

The sixth of the year
was a very wet one
and the crops were
very good.

The seventh of the year
was a very dry one
and the crops were
very poor.

STATISTICAL SECTION

INTRODUCTION TO STATISTICAL SECTION

This section presents statistical information in the form of charts and tables to provide the reader with further data about the Retirement Systems. Some of this information is in the form of charts that graphically illustrate the trends in membership and portfolio growth. All information is presented as of June 30, 1990, though some of the information is inclusive of all activity since the inception of the systems.

RETIREMENT PAYMENTS

The first table shows average monthly benefits being paid based on years of service credit. The next three tables show the benefit payments for each section by the payment option selected by the member or surviving beneficiary. Because of legislation passed in 1974, those members who have accounts in the Kentucky Employees Retirement System, County Employees Retirement System, State Police Retirement System, Legislators Retirement Plan or Kentucky Teachers' Retirement System may have their accounts combined for determining eligibility for benefits and the salary to be used to determine those benefits. However, each system pays a separate benefit based on the service in that system.

For this reason, any particular system may pay only a small amount of the member's total benefit. While these small payments are important to the retiree, they do tend to distort the statistics contained in the tables.

In addition, the monthly benefits shown include all living retirees or beneficiaries who were drawing a payment from the systems. In fact, more than 10,000 recipients are over age 70, and there are hundreds of accounts on which benefits have been paid for more than 20 years. Since benefit factors and salaries were lower years ago, these also contribute to a distortion of the "average" benefit.

The following table shows a comparison by system of the number of retirees and their years of service at the time of retirement.

| | SERVICE RANGES IN YEARS/NO. OF RETIREES | | | | | | | | |
|------|-----------------------------------------|-----|------|-------|-------|-------|-------|-------|-----|
| | UNDER 2 | 2-5 | 6-10 | 11-15 | 16-20 | 21-25 | 26-30 | 31-35 | 35+ |
| KERS | 179 | 515 | 3293 | 3536 | 2664 | 2172 | 1496 | 1399 | 746 |
| CERS | 235 | 655 | 3584 | 2752 | 1534 | 1181 | 561 | 363 | 230 |
| SPRS | 11 | 8 | 14 | 13 | 29 | 100 | 146 | 78 | 6 |

The first chart following this introduction shows average monthly benefit payments for these same service ranges. The statistics for those retiring during fiscal year 1989-90 are as follows:

| SYSTEM | AVE. FINAL COMP. | AVE. MO. BENE. | % RETIRING WITH YRS. SVC. | | | |
|--------|------------------|----------------|---------------------------|-------|-------|-----|
| | | | Under 20 | 20-25 | 25-30 | 30+ |
| KERS | \$18,015 | \$ 404.39 | 78% | 14% | 4% | 4% |
| CERS | \$15,980 | \$ 437.03 | 74% | 17% | 5% | 4% |
| SPRS | \$30,403 | \$1,135.92 | 22% | 62% | 0% | 6% |

Table 5 presents a county-by-county summary of total retirement payments over the fiscal year. This table gives an indication of the importance of retirees' income to their communities and shows that the majority of our retired members continue to live within the state.

MEMBERSHIP

Table 6 provides a picture of the growth in membership of the three systems. This table clearly shows the continuing growth of the County Employees Retirement System, which has now passed KERS in the numbers of both active and inactive members. Following are the membership totals as of June 30, 1990:

| | ACTIVE | INACTIVE | RETIRED |
|----------------|--------|----------|---------|
| KERS | 45,284 | 10,513 | 15,499 |
| KERS-Hazardous | 605 | 183 | 116 |
| CERS | 49,159 | 11,741 | 9,670 |
| CERS-Hazardous | 4,449 | 218 | 789 |
| SPRS | 979 | 105 | 418 |

FINANCIAL AND ACTUARIAL STATISTICS

Tables 7 through 9 provide a compilation of important information about each system drawn from the financial and actuarial reports. These tables provide a summary of the systems assets and liabilities and show the adequacies of the current contribution rates in funding benefits at current levels.

SOURCE AND USE OF FUNDS

Table 10 provides a breakdown of each dollar, its source and where it goes, since the inception of the Retirement Systems.

ADMINISTRATIVE EXPENSE

Finally, Table 11 provides a five-year history of administrative expenses.
